Transforming economics and governance for better health and sustainable societies

Population Health Congress 2012 Pre Conference Workshop Sunday 9 September

What are the remedies for healthy sustainable societies?

This workshop will explore the need for a transformation of our systems of economics and governance to ones that recognise and support ecological sustainability and limits to growth.

What else is possible?

This workshop will: encourage a systems approach to public health; provide an overview of the movement for societal transformation occurring globally; and facilitate links between the transformation agenda and health professionals. **All welcome.** [CLICK HERE TO REGISTER.](#)

Adelaide Convention Centre , Level 1, Room 10
1.00-4.30pm Sunday 9th September, 2012
