**Board Selection Committee**  
Albert Party

Dear Members of the Board Selection Committee,

I am writing to express my interest in serving as a member of the Alberta Party Board. Having been a party member for over six years, I have developed an affinity with the organization's vision and its principles for shaping provincial policies. My motivation to serve is founded in a passion for ensuring that decisions made tomorrow lead to a stable, a sustainable, and a more prosperous future for our province.

I believe future governance must be guided by openness, with honesty and integrity. This would acknowledge Indigenous rights and the continued pursuit of reconciliation; providing a sound direction for economic development within the existing confines of Confederation and building a holistic social infrastructure based on compassion and efficiency.

Conservative values are at the core of my character, specifically, a desire for fiscal responsibility. Progressive elements are also represented in fairness and integrity. As a Board member, I would work to ensure that every dollar is spent wisely and transparently, with measurable benefit to the people we serve. Equally important is the need to restore public confidence in politics by integrating honesty, accountability and respect into every communication and decision.

Albertans deserve leadership that listens—one that is fair to citizens, one that understands the value of environmental stewardship, and that acts decisively to protect our natural heritage. I am committed to promoting policies that balance economic growth with environmental responsibility, recognizing that long-term prosperity depends on sustainable practices. I believe that through collaborative leadership we can redefine what it means to serve the public good.

Thank you for considering my application. I would be honoured to contribute my experience, commitment, and vision to the Board, and I welcome the opportunity to discuss how I can best support its ongoing work.

Sincerely,

Timothy Woodard

### **Consultant RouteMapper Field Operator**

2003 - 2010

Edmonton, AB.

- RouteMapper is a mobile based surveying platform. By synchronizing a GPS receiver with digital cameras a vehicle can record a visual record of any road corridor. The RouteMapper suite also includes a desktop browser application that can replay this imagery from which GIS asset extraction can take place. The result is a fully adaptable GIS database that will setup any client to manage assets and inventories.
