Dear Dr Mackie and Dr Geyer

Improved Treatment and Care for Lymphoedema

I refer to your request for support to improve access to treatment for those suffering from lymphoedema as part of the Lymphoedema Action Alliance 2019 NSW State Election Platform.

In Parliament I have supported Lymphoedema Action Alliance campaigns and asked the Minister for Health a number of questions including for increased funding, expanded services and publication of services on NSW Health websites. Additional funding would prove a good health investment, leading to fewer hospitalisations while significantly improving quality of life for affected people.

I share your concern about the difficulties getting treatment for this debilitating condition and if re-elected I am committed to again raising these concerns with the health minister.

Yours sincerely

Alex Greenwich
Member for Sydney
