

Americans for Safe Access

Our mission is to ensure safe & legal access to cannabis for therapeutic use & research.

V I S I O N

We are advocating for a national framework that recognizes cannabis as a medicine, invests in the development of standardized cannabis-based products, ensures a safe & consistent supply, fosters medical professionals integrating cannabis into their patients' treatment plans as a frontline medication, removes all criminal penalties, encourages insurance coverage, & prohibits employment, housing, parental & healthcare discrimination.

**EDUCATE & EMPOWER:** ASA provides medical cannabis, wellness, and healthcare stakeholders with resources to better understand the therapeutic benefits of cannabis and cannabinoids, how to navigate laws and regulations safely, and how to advocate for patients in all policy matters.

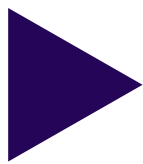

**HEALTHCARE INTEGRATION:** ASA works to integrate cannabis therapeutics into healthcare systems, aiming for medical cannabis to be covered by insurance and readily available nationwide. This involves addressing knowledge gaps and fostering a regulatory environment that supports medical cannabis use in treatment plans.

**ADVOCACY & POLICY:** ASA advocates for policies that remove barriers to access to cannabis therapeutics at state, federal, and international levels. ASA promotes the recognition of cannabis as a legitimate medicine, including policies that inform the development of standardized cannabis-based products, ensure a safe and consistent supply, and support the autonomy of individuals to cultivate and produce their medicines.

**PRODUCT SAFETY:** ASA has created internationally recognized product safety standards for the cannabis and hemp supply chain. ASA educates all stakeholders on the importance of product safety protocols, provides policy guidance and tools for their adoption, and offers training for the cannabis/hemp workforce and regulators.

**END DISCRIMINATION:** ASA strives to eliminate criminal penalties as well as employment, housing, parental, and healthcare discrimination against anyone who is utilizing cannabis in treatment or to improve their quality of life.

ACTION!
