# TAKING ACTION FOR MEN'S HEALTH

In April 2019 the Federal Government published the National Men's Health Strategy (2020-2030).

The Strategy calls on all levels of government to take action to address the unique needs of men and boys in the policies they develop, the programs and services they deliver and the initiatives they fund.

One of the guiding principles that underpins this Strategy is that the actions we take to improve men and boys' health must address the "gender inequality issues faced by men".

According to researchers at the University of Canberra the majority of Australians support equality between men and women, but are concerned that men and boys are increasingly excluded from measures to improve gender equality.

The solution to this problem is not to stop working to improve the lives of women and girls, but to increase our efforts to tackle the issues facing men and boys.

One of the barriers to improving men's health is that there is very little research highlighting the gender inequality issues that men and boys face.

The 2019 Men's Health Report Card series is a first attempt to bring some of these issues together and measure how well each State and Territory is doing for men and boys.

The facts are compelling. Our sons are less educated than our daughters. Our brothers die younger than our sisters. Our fathers are more likely to die at work than our mothers. Our male friends are more likely to die by suicide than our female friends.

The 2019 Men's Health Report Card for South Australia highlights 10 key areas where men and boys are not faring as well as women and girls.

The intention of this report is to inspire key stakeholders across South Australia to focus more time, money and energy on improving the lives and health of men and boys in alignment with the National Men's Health Strategy (2020-2030).

This report focuses on average statistics for males and females in Australia and highlights some of the key gender inequalities that men and boys experience. It doesn't measure the inequalities that exist between different groups of men, such as the many gaps that exist between Indigenous and non-Indigenous men.

The Australian Men's Health Forum would welcome more investment into men's health research to ensure that data is made available on all the priority groups identified in National Men's Health Strategy.

By taking collective action on the gender issues that impact men and boys of all backgrounds, we can create a healthier future for men and a healthier future for everyone.

# STILL DYING YOUNGER

Australia is one of the world’s healthiest countries, yet men die six years younger than women on average.

In 2017, the median age of death for men in Australia was 79.1 years, with women living to 85.1 years on average.

Men in South Australia are dying young than men in Victoria, but living longer than men in New South Wales, the ACT, Tasmania, WA, Queensland and the Northern Territory.

SA men are also dying 6.1 years younger than women across the state, whose average age of death is 85.8 years (compared with 79.7 for men).

The good news is that the average age of death for men in SA has risen by 1.1 years in the past decade, from 78.6 years in 2007 to 79.7 years in 2017.

### LONGEVITY

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	VIC	SA	NSW	ACT	TAS	WA	QLD	NT
MALE	80.5	79.7	79.6	78.4	78	77.8	77.8	63.2
FEMALE	85.7	85.8	85.5	85.2	84.2	84.4	83.9	66.3

Table 01: Median age at death by sex, State and Territory (2017). Source: ABS

Looking to the future, the life expectancy of boys born in SA in 2015-2017 is 80.3 years. This varies from area to area with boys in Adelaide Central & Hills expected to live 5 years longer than boys in the SA Outback (82.7 years compared with 77.7 years).

## “MEN IN SOUTH AUSTRALIA DIE 6.1 YEARS YOUNGER THAN WOMEN”

The widest regional gap in life expectancy in SA is the 8.5 years between boys born in SA Outback and girls born in Adelaide Central & Hills (86.2 years compared with 77.7 years).

Overall, men in SA are **second** in our league table of longevity across Australia, based on the average age of death for men and women in each State and Territory in 2017.

# MEN OF GOOD HEART

Heart disease is the biggest killer of Australian men. In SA, four people a day die from heart disease.

Four out of five people who die of heart disease before the age of 65 are men. In total, nearly 12 men aged under 65 die from heart disease every month in SA.

Men also account for nearly 80% of the years of life lost to heart disease in SA every year.

When compared with women of the same age in SA, heart disease kills:

- 8 times more men aged 35-44
- 3.5 times more men aged 45-54
- 3.3 times more men aged 55-64
- 2.9 times more men aged 65-74

For people aged 75 and over the number of men and women who die from heart disease in SA is almost equal.

Overall, the rate of heart disease in men is 77.3 per 100,000, which is lower than the national average of 78.7.

## “4 IN 5 HEART DISEASE DEATHS UNDER 65 ARE MEN”

### HEART HEALTH

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	WA	ACT	VIC	SA	NSW	QLD	TAS	NT
MALE DEATH RATE	72.8	74.1	76	77.3	86.2	88.3	93.6	102.3
FEMALE DEATH RATE	38	45	40.9	41.3	65.5	50.4	47.3	52.4

Table 02: Standardised death rate for ischaemic heart disease per 100,000 population (2017). Source: ABS

Men in SA are less likely to die from heart disease than men in the NT and TAS, QLD and NSW, but die younger than men in VIC, the ACT and WA.

In terms of our league table of male heart disease, men in SA are currently in fourth place.

# BEATING MALE CANCER

Cancer is a leading cause of poor health in Australia. One in two men will be diagnosed with cancer before their 85th birthday and in SA, nearly a third of men (30.4%) and a quarter of women (25%) die from cancer every year.

Nationally cancer kills nearly 500 men and 400 women a week. Closing that gap would save the lives of around 5,000 men a year.

CANCER PREVENTION

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	SA	TAS	ACT	WA	VIC	QLD	NSW	NT
MALE PARTICIPATION	44	44	41.7	41	41	39.2	36.6	27.2
FEMALE PARTICIPATION	45.1	48.8	45.1	45	45.4	42.3	39.8	29

Table 03: National Bowel Cancer Screening Program participation for people aged 50-74 (2016-2017). Source: AIHW

## “1 IN 3 MEN DIE OF CANCER”

In SA, cancer kills 180 males and 145 females every month with men and boys accounting for 55.3% of all cancer deaths.

Bowel cancer is the third leading cause of cancer deaths in SA, killing around 200 men and 150 women each year. Bowel cancer can be detected and treated early through the National Bowel Cancer Screening Program.

Screening rates vary from region to region. In general, screening programs are better at reaching women, with 43.2% of women aged 50-74 accessing screening compared with 39.4% of men.

In SA, 44% of men and 45.1% of women access screening for bowel cancer. The number of people accessing screening increases with age, with three in 10 men (30.5%) aged 50-54 in SA being screened compared with three in five women (60.1%) aged 70-74.

In terms of our league table of male cancer, based on the National Bowel Cancer Screening Program, men in SA are currently in *first* place.

# PREVENTING MALE SUICIDE

## “3 IN 4 SUICIDES ARE MEN”

Suicide is the leading killer of men under the age of 55 in Australia. It takes the lives of eight people a day, six men and two women.

Nationally, three in four suicides are men.

This pattern is repeated in SA. In 2017 there were 224 deaths by suicide, 164 male suicides and 60 female suicides.

Every week an average of more than three men die by suicide in SA, with men accounting for 73.2% of suicides.

Overall, the rate of male suicide in SA is 19.6 deaths per 100,000 people, which is higher than the national average of 18.5 per 100,000.

Men in SA have a higher rate of suicide than NSW, the ACT and VIC, and are less likely to die by suicide than men in WA, QLD, TAS and the NT.

In our league table of male suicide prevention around Australia, SA is currently in *fourth* place.

MALE SUICIDE

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	VIC	ACT	NSW	SA	WA	QLD	TAS	NT
MALE SUICIDE RATE	15.3	16.1	16.1	19.6	21.8	23.3	23.8	25.9
FEMALE SUICIDE RATE	5.1	5.2	5.1	6.8	7.7	6.9	7	12.2

Table 04: Standardised death rate for intentional self-harm per 100,000 population (2017). Source: ABS

# CREATING A HEALTHIER FUTURE FOR MEN AND BOYS

## A CONCEPTUAL FRAMEWORK FOR TAKING ACTION TO IMPROVE MEN AND BOYS' HEALTH

### FRAMEWORK FOR A HEALTHIER FUTURE

When tackling a complex social issue, such as improving men's health, a conceptual framework can help us to create a map of the many different factors that are at play. Most people understand that having a detailed and accurate map can help us plan the best route to a chosen destination.

In a similar way, creating a conceptual framework around an issue like men's health, helps us to understand the territory we are operating in and map out a range of pathways we could take to try and tackle the issue.

Our Framework for a Healthier Future builds on the work of existing conceptual frameworks and introduces two additional features that are generally overlooked:

- It places a specific focus on the factors that are known to shape men and boys' health;
- It acknowledges the fact that there are many different views about gender issues.

# THE ROAD TO NOWHERE

Transport accidents kill around four people a day in Australia and three of them are men and boys.

In SA, transport accidents kill two men and boys every week.

There were 128 road deaths in SA in 2017 (101 male and 27 female).

In SA, men and boys account for:

- 3 in 4 car occupant deaths (49 of 66 fatalities)
- 3 in 4 pedestrian deaths (12 of 16 fatalities)
- 100% of cyclist deaths (3 of 3 fatalities)
- 96% of motorcyclist deaths (24 of 25 fatalities)

In total, 78.9% of people who die in transport accidents in SA are male, with men and boys accounting for 81.4% of the years of life lost to transport accidents in SA every year.

Road deaths are the second biggest killer of boys and young men in SA after suicide. In 2017, seven young men (aged 15-24) died in motorcycle accidents and 10 of the 14 car occupants aged 15-24 killed in transport accidents were male.

Men and boys in SA are more likely to die on the roads than males in the ACT, VIC, NSW and QLD, but less likely to die in transport accidents than men and boys in TAS, WA and the NT.

In our league table of road safety, SA is currently in *fourth* place.

## ROAD SAFETY

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	n/a
STATE / TERRITORY	VIC	NSW	QLD	SA	TAS	WA	NT	ACT
MALE DEATH RATE	6.2	6.7	9.4	11	11.5	12.2	22.9	n/a
FEMALE DEATH RATE	2.4	2.3	3.4	2.7	n/a	2.8	n/a	n/a

Table 05: Standardised death rate for transport accidents per 100,000 population (2017). Source: ABS

# DYING TO WORK

The world of work has a major impact on everyone’s lives and health and can promote and prevent good health.

Research shows that while work can impact everyone’s health, the health risks and health benefits of work have a more profound impact on men. The reasons for this include the fact that men are more likely to be employed, work full time, be their household’s main earner and work in high-risk environments.

Men spend twice as many hours in paid work as women, doubling their exposure to the risks and benefits of work. For example, men account for 72% of work-related disease and two in three serious claims for workers’ compensation.

14 workers were killed at work and all fatalities were men.

The rate of workplace fatalities in SA is 1.7 fatalities per 100,000 people. This places SA *fifth* in our league table of the safest places to work.

## “100% OF WORKPLACE DEATHS IN SA ARE MALE”

### SAFEST PLACES TO WORK

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	ACT	VIC	WA	NSW	SA	QLD	TAS	NT
NUMBER MALE DEATHS	0	33	19	56	14	43	5	6
% MALE DEATHS	0%	91.7%	95%	90.3%	100%	95.6%	100%	85.7%

Table 06: Work-related traumatic injury ‘worker’ fatalities by state/territory of death (2017). Source: Safe Work Australia

# DAD’S THE WORD

The evidence that involved dads positively influence their children’s health, social success and academic achievements is compelling and robust. Involved fatherhood has also been linked to improvements in men’s and women’s health.

To date, we have identified three possible ways to compare levels of father involvement across Australia. None of these measures are entirely satisfactory, but we hope their inclusion in this report will help start a conversation about the health and social benefits of involved fatherhood.

## “1 IN 5 CHILDREN ARE LIVING IN LONE-PARENT FAMILIES”

The first measure, is the number of births in 2017 where the biological father was not acknowledged on a child’s birth certificate. In SA, 2.8% of children born each year have a father who isn’t acknowledged on their birth certificate. This is third lowest rate in Australia.

The second measure is the proportion of children born outside of marriage, which is now around one third of births nationally. In SA, one in three births (36.2%) occur outside of marriage, the fifth highest rate nationally.

The third measure is the proportion of children living in lone-parent families in each State and Territory as a majority of these families are headed by mothers. In SA, one in five children (20.3%) are living in lone-parent families. This is the fifth highest rate in the country.

In future, we may look to compare how much parental leave fathers are taking, how many dads are primary carers, how many hours dads spend on childcare and how involved separated dads are in their children’s lives.

Based on the data we’ve used this year, SA is currently placed *fourth* in our table of fatherhood involvement nationwide.

### FATHERHOOD INVOLVEMENT

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	ACT	VIC	NSW	SA	WA	QLD	TAS	NT
FATHERS NOT REGISTERED	2	1.9	3.4	2.8	4	5.4	3.7	14.6
EX-NUPTIAL BIRTHS	26.2	30.1	31.5	36.2.	37.8	42.3	50.5	57.6

Table 07: Rate of confinements by nuptiality (2017); Proportion of children aged under 15 years living in lone-parent families (2011). Source: ABS

# IMPROVING BOYS’ EDUCATION

Education is one of the key social factors that shape our lives and our health. Lower levels of education can be linked to shorter life expectancy, poorer physical and mental health, lower wages, higher risk of unemployment and greater exposure to crime.

In general terms, the better your education the better your health (and the longer you stay at school, the longer you’ll live). As far as boys are concerned, the education system across Australia delivers better results for girls at every stage.

In SA, the latest NAPLAN results for Year Five students found that boys are:

- 1.7 times more likely to be below minimum reading standards
- 2 times more likely to be below minimum writing standards
- 1.3 times more likely to be below minimum numeracy standards

## “THREE TIMES MORE SA BOYS FAIL TO COMPLETE YEAR 12”

Boys in SA are nearly three times more likely than girls to drop out of school before the end of Year 12. The latest data on the number of men working in schools in SA found that just over one in four (28.1%) teaching staff are male.

Overall, we placed SA *third* in our boys’ education league table behind the ACT and VIC.

### BOYS’ EDUCATION

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	ACT	VIC	SA	NSW	QLD	TAS	WA	NT
BOYS / GIRLS WRITING	11.6% / 5.3%	9.3% / 3.7%	19.4% / 9.5%	12.4% / 5.2%	17.1% / 7.8%	20.9% / 7.4%	19.4% / 9.5%	43.4% / 33.4%
MALE / FEMALE DROP OUT	9.4% / 4.9%	19.4 % / 11%	13.6% / 4.7%	27.8% / 19.5%	14.2% / 10.1%	30.9% / 22.4%	17.5% / 12.3%	37% / 32.7%
MALE WORKFORCE	27.4%	26.9%	28.1%	25.2%	24.8%	28.5%	23.5%	26.3%

Table 08: Percentage of Year 5 students below national standard (2018); Apparent percentage of students not retained from Year 10 to Year 12 (2018); Percentage of male in-school staff, full-time equivalent (2018). Sources: NAPLAN / ABS

# DEVELOPING MALE-FRIENDLY SERVICES

The statistics outlined in this report portray an alarming landscape in the state of men and boys' health. The good news, however, is that Australia is a world leader in developing male-friendly approaches to working with men and boys.

The National Men's Health Strategy supports this approach by making the provision of "male-centred information, programs & services" its guiding principle.

But what does a male-friendly approach to men's health look like? Some of the common ingredients that have been shown to make services more accessible to men are listed below:

- they target men directly – not patients, not parents, but men!
- they go where men already are
- they make use of male-friendly activities
- they use male-friendly language
- they take a strengths-based approach that is positive about men.

You'll find some or all of these characteristics built into the design of male-friendly services around Australia. Here we provide eight examples of good practice representing every State and Territory in Australia.

## The Men's Health Educational Rotary Van (MHERV)

MHERV is custom-built caravan with two consulting rooms and a dedicated registered nurse who travels around the state of New South Wales. It targets regional and rural men directly, offering free health screenings to cover approximately 2,000 men a year in over 50 communities. It goes where rural men are, often targeting male-friendly events like country shows.

## Prick 'n A Pint

What could be more male-friendly than a pint down at the pub with your mates? Prick 'n A Pint is a Victorian project delivered to male-only groups over a pint (or non-alcoholic drink) in a pub. The 10 weekly sessions are guided by a GP in line with RACGP guidelines. The Prick (in case you wondered) is a blood test that is referred to throughout the program.

## MATES In Construction

MATES In Construction is a workplace suicide prevention project that started in Queensland and has expanded all over Australia.

By focusing on a male-dominated industry, it takes its services where men already are. MATES is designed around the principle that providing help is a male strength. A central plank of the MATES' model is training and encouraging construction workers to offer support to co-workers who show signs of suicide risk.

## Royal Flying Doctor Service (RFDS)

The Royal Flying Doctor Service (RFDS) in South Australia launched a male-friendly health prevention service in 2017. The service targets men directly by sending medical teams to outback events like rodeos, that attract a large male crowd. As well as being on hand to deliver first-aid, medical teams offer health checks to men which include measuring blood pressure and glucose levels. They also promote cancer awareness by providing guidance on how to check for testicular cancer and skin cancer.

## First Track Pit Stop

The 'First Track Pit Stop' program is a classic example of a program that uses male-friendly language to improve men's health. Delivered by The Regional Men's Health Initiative, the program is built out of the back of a branded Ute that travels around regional WA. The service offers health awareness, a listening ear and a number of services themed around the servicing of a vehicle including waist measurement ('chassis'), blood pressure tests ('oil pressure') and coping skills ('shock absorbers').

## The Blokes Book

The Blokes Book is a male-friendly guide to support services that have been doing the rounds since 2005, when it was developed by a network of men's workers in Western Sydney. There are now various versions of the book in circulation in Australia and New Zealand with the latest upgrade being created by Men's Resources Tasmania. The Tasmanian Blokes Book provides an extensive directory of information to help men deal with a range health issues and life crises.

## StrongBala

The StrongBala Justice Program based at the Wurli-Wurlinjang Health Service in the Northern Territory recognises the fact that men's health is shaped by a broad range of social and cultural issues. StrongBala, which is based in Katherine aims to give Indigenous men regular access to culturally appropriate holistic health, justice and drug and alcohol counselling services. It provides educational sessions through a personal development program and refers men to internal and external health providers and other agencies as required.

## OzHelp

OzHelp is a leading provider of workplace well-being programs, based in Canberra and delivering nationally. It targets male-dominated workplaces and specialises in mental health and suicide prevention. The fear that revealing mental issues to an HR department could have career-limiting implications is very real and so OzHelp provides male-friendly tools such as its Workplace Tune Up, which are both personalised and private.

# BUILDING MEN'S ECONOMIC SECURITY

Our health is closely linked to our economic wellbeing. Broadly speaking, the better your economic status, the better your health.

There are around two million men in Australia who are experiencing some form of economic insecurity. Having secure, well-paid work is one of the key ways to improve the health of our finances.

## “2 MILLION MEN EXPERIENCE ECONOMIC INSECURITY”

In March 2019, 68.3% of men and 58.2% of women in SA were participating in the labour force, with men accounting for 65% of people working full time and 29% of those working part time.

### ECONOMIC SECURITY

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	7 <sup>th</sup>	8 <sup>th</sup>
STATE / TERRITORY	ACT	NSW	VIC	QLD	TAS	NT	SA	WA
UNEMPLOYMENT RATE	4.1	4.3	4.5	5.6	6.1	4.8	6.4	6.5
% UNEMPLOYED	55.8	54	51.4	49.5	48.6	58.7	57.5	59

Table 09: Trend male unemployment rate by State/Territory (March 2019) / Percentage of unemployed persons who are male (March 2019)

Men also account for more than half of those who are unemployed, with 60% of those looking for full-time work and 50% seeking part-time roles being male.

The number of men who are not in the labour force (NILF) rose by 130% from around 90,000 to approaching 220,000 between 1978 and 2018. In the same period, the number of NILF women rose by just 13%.

As of March 2019, the male trend unemployment rate in SA was 6.4%, higher than the national average of 5%. More than half of unemployed people (57.5%) and the majority of unemployed people looking for full-time work (60.4%) are men.

Based on the male trend unemployment rate, we placed SA **seventh** in our league table for economic security.

# STRATEGIC SUPPORT FOR MEN'S HEALTH

All levels of government in Australia place greater focus on improving the lives and health of women and girls than men and boys.

There is a comprehensive framework of activity at federal, state and territory level that ensures time, money and resources are focused not just on women's health, but on the social issues that shape women's health.

At a national level, the Office For Women works on three priority areas: women's economic security and workforce participation, women in leadership positions and preventing violence against women and children. The Office for Women funds six women's alliances representing women's organisations across Australia.

Other Government initiatives include a women's health strategy, a national plan to prevent violence against women, the Workplace Gender Equality Alliance and the Australian Human Rights Commission, which address sex discrimination against women.

Funding for health initiatives often overlooks men. In 2014 it was revealed that the National Health and Medical Research Council had invested four times more money into research on women's health than men's health. In 2015-2016, an estimated 93% of the \$409m we spent on cancer screening was targeted at women.

## “WE NEED MORE FOCUS ON IMPROVING MEN'S LIVES”

This doesn't mean we should stop working to improve the lives of women and girls. It does mean there is much more we could be doing at a collective level to improve the lives and health of individual men and boys.

South Australia's Office for Women provides executive support to the Premier's Council for Women and is responsible for a Women's Policy that focuses on three pillars of action: improving women's economic status, increasing women's leadership and participation and improving women's safety and wellbeing.

Our league table on strategic support for men's health places SA in fifth place for its work engaging Port Adelaide player Robbie Gray as a men's health ambassador.

WA is in first place because of its comprehensive Men's Health and Wellbeing policy with NSW a close second because of the development of its Men's Health Framework.

The NT is third because of the work of its Men's Health Strategy Unit since 2011. Victoria comes fourth because its Gender Equality, Health and Wellbeing Strategy does place some focus on men and boys.

We placed QLD, TAS and the ACT in equal sixth place, as we were unable to identify any significant strategic work focused on men and boys' health.

### STRATEGIC SUPPORT

RANK	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>	6 <sup>th</sup>	6 <sup>th</sup>
STATE / TERRITORY	WA	NSW	NT	VIC	SA	ACT	QLD	TAS

Table 10: Level of strategic support given to men's health (2019) Source: Australian Men's Health Forum

# WORKING TOGETHER FOR MEN’S HEALTH

There are many areas of life where men and boys in SA are not faring as well as women and girls.

Men die 6.1 years younger than women; four in five heart disease deaths under 65 are men; three in four suicides are men; transport accidents kill two men and boys a week; 100% of workplace deaths are male; boys are three times more likely not to complete Year 12 than girls and the number of men not in the labour force has risen by nearly 130% since 1978.

At the same time, we continue to invest less time, money and resources into improving the lives of men and boys, than women and girls.

The intention of the report card is to inspire key stakeholders across SA to take collective action to tackle the gender issues that impact

men and boys in alignment with the National Men’s Health Strategy (2020-2030).

This work needs to focus on men and boys in general, as well as targeting all of the priority groups identified in the Strategy like Aboriginal and Torres Strait Islander men.

When compared with other States and Territories, the 2019 Men’s Health Report Card ranked SA fourth behind the ACT, VIC and NSW.

By working together to improve the lives and health of men and boys, we can build on this position and help create a healthier future for everyone in South Australia.

## MEN’S HEALTH REPORT CARD

RANK	ACT	VIC	NSW	SA	WA	QLD	TAS	NT

A photograph of a man and a young boy running on a sandy beach. The man, wearing a blue and white plaid shirt over a grey t-shirt, is smiling and holding the boy's hand. The boy, wearing a blue t-shirt and green shorts, is also smiling and running. The background shows the ocean and a clear sky. The image is framed by a teal and blue geometric design.
