

Ward 3

2023 Construction Projects

Roads

These projects improve the quality of the road network. Through comprehensive assessments of the road structure, sidewalks, curbs and gutters, projects to improve the overall health of the road network are identified and implemented. Various programs are in place to ensure all types of roads are considered by focusing on both residential roads and more major roads (arterial and collectors).

For efficiency, road work is planned in collaboration with water, wastewater, and drainage projects in order to integrate infrastructure improvements.

In 2023, the City plans to renew 25.8 km of roads.

Road Renewal – Full or selected sidewalk, curb and gutter replacement, followed by paving.

- 11th Avenue Revitalization Project, Year 1 of 4
- 13th Avenue – Angus Street to Albert Street
- Albert Street – 7th Avenue to 3rd Avenue
- Lewvan Drive – Regina Avenue to 11th Avenue

Road Rebuild – Road structure renewal with or without underground infrastructure improvements, followed by full sidewalk, curb and gutter replacement, and followed paving.

- Dewdney Avenue Corridor Renewal Project

Maintenance Pave – Road surface treatment for smoother safer roads for drivers and cyclists.

- Rae Street – Dewdney Avenue to 10th Avenue
- Retallack Street – Dewdney Avenue to 10th Avenue
- Robinson Street – 9th Avenue to Dewdney Avenue

Bridge Renewal

- Elphinstone Street over Wascana Creek
- Pasqua Street over Wascana Creek

Traffic

These projects ensure continued safe movement of vehicles and pedestrians through Regina. Traffic infrastructure improvements include installing and upgrading traffic and pedestrian signals and increasing traffic capacity at intersections. This work is driven by studies, analysis and warrants and growth predictions.

New Traffic Signals

- Albert Street and 8th Avenue
- REAL Grounds

Signal Rehabilitation

- Albert Street and 5th Avenue
- Albert Street and 7th Avenue

Pedestrian Safety Enhancements

- 7th Avenue and Robinson Street
- Elphinstone Street and 1st Avenue

Permanent Pavement Marking

- College Avenue – Albert Street to Broad Street

Expressway Lighting

- Lewvan Drive – Regina Avenue to 13th Avenue

Pedestrian Connectivity and Active Transportation

These projects focus on connecting existing transit routes, multi-use pathways and schools. Investment in assets including pathways, on-street cycling and pedestrian connectivity supports the ability of residents to shift from single occupancy vehicles to active or public transportation modes.

On-Street Cycling and Multi-use Pathways

- 14th Avenue – Athol Street to Lorne Street
- College Avenue – Albert Street to Winnipeg Street

Water

These projects help maintain and improve the water system to ensure safe, clean drinking water throughout our community. In addition to stand-alone water construction projects, water system improvements are completed in conjunction with road construction. The technology used is determined based on best value. Technologies can include low-dig methods, such as relining and directional drilling, or open trench construction.

In 2023 the City plans to reline 5.1 km of watermain, replace 4.8 km of watermain, replace 117 poly B service connections and replace 220 City-side lead service connections.

Watermain Renewal

- College Avenue – Montague Street to Rae Street
- Robinson Street – College Avenue to 14th Avenue
- Broad Street – 12th Avenue to Saskatchewan Drive

Lead Service Connection Replacements

- 18th Avenue – Winnipeg Street to Broder Street
- Albert Street – 7th Avenue to 3rd Avenue
- College Avenue – Montague Street to Rae Street
- Dewdney Avenue – Albert Street to Broad Street
- Elphinstone Street – 17th Avenue to College Avenue
- Rae Street – 10th Avenue to Dewdney Avenue
- Retallack Street – Dewdney Avenue to 9th Avenue
- Robinson Street – 9th Avenue to Dewdney Avenue
- Robinson Street – College Avenue to 14th Avenue
- Saskatchewan Drive – Broad Street to Winnipeg Street

Wastewater & Drainage

These projects renew and extend the life of our aging domestic and storm sewer infrastructure. The City uses a cleaning and inspection method to determine the condition of the underground infrastructure. Depending on the condition assessment, either relining or replacement techniques are selected. Sewer relining is a less invasive, more cost-effective, and efficient method than the traditional method of excavating and replacing the pipe (about one third the cost of full replacement). These processes renew the City's pipes for another 50 plus years of service.

In 2023, the City plans to renew 11.0 km of domestic sewer and clean and inspect 110 km of domestic sewer and 20 km of storm sewer.

North Central Drainage Upgrade Project – Upgrades to water, wastewater, drainage infrastructure and roads to improve drainage.

- 3rd Avenue and Argyle Street intersection
- Athol Street – 5th Avenue to 3rd Avenue
- Garnet Street – 5th Avenue to 4th Avenue
- Montague Street – 5th Avenue to 4th Avenue

Facilities

These are projects to maintain the integrity of City facilities to ensure programs and services can continue to be delivered. Projects include roof replacements and structural, architectural, mechanical, electrical and code or safety improvements.

Facilities Upgrades and Construction

- Downtown Accessible Washroom – 12th Avenue between Lorne Street and Scarth Street
- New Salt and Sand Storage Facility – 1483 6th Avenue
- City Hall Incoming Electrical Service – 2476 Victoria Avenue

Parks, Open Space and Recreation

These projects enhance the quality of life in Regina by improving access to and quality of recreational infrastructure and ensuring open spaces are in a safe and useable condition. This is achieved through improvements to existing infrastructure and beautification initiatives.

Tree Planting

- 4101 Dewdney Avenue

Recreational Space Upgrades

- 4055 15th Avenue – Changing lights in Les Sherman Park to LED lights

External Partners' Projects

These projects originate from external partner organizations. The City works with external organizations to ensure both their construction plans and the City's are scheduled and coordinated together.

- SaskPower Duct Bank Renewal Project – please refer to the council map for locations.
- YWCA Infrastructure Upgrades – 1915 12th Avenue – New watermain

Note - All project timelines are pending weather or other unforeseen circumstances. Some projects may have their scope modified or work deferred until later in 2023 or into 2024 if materials are delayed or the work cannot be completed to the satisfaction of the City of Regina.
