

# AUSTRALIA'S BIGGEST CLIMATE POLL: 2022

This infographic contains survey data collected and analysed by YouGov.

## Warringah

The federal government's current climate target is to cut Australia's emissions by 26-28% by 2030. Which is closer to your view regarding Australia's national target?

**17%**

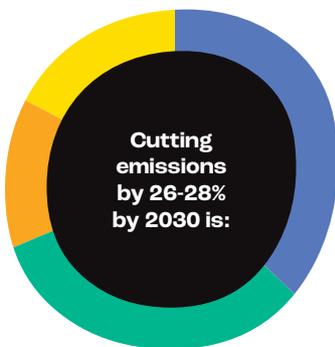

Don't know

**14%**

Too much

**31%**

Doing enough

**37%**

Too little, too late

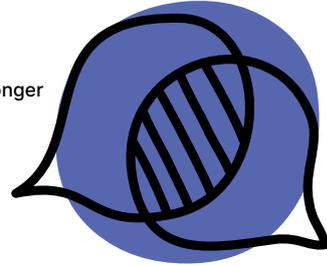

Which of the following best reflects your view about the impact of action on climate change on the Australian economy?

**22%**

Action on climate change will make the economy stronger now and in the long-term

**43%**

Action on climate change will produce some short-term costs but then long-term benefits

**25%**

Action on climate change will harm the economy both in the short and long-term

**11%**

None of the above

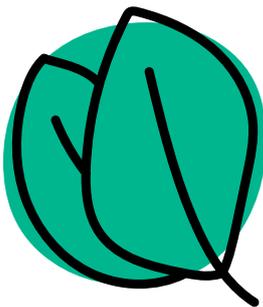

Which is closer to your view?

**16%**

Supports action on climate change, even if it costs personally in the short-term

**47%**

Supports action on climate change because the benefits outweigh the costs

**12%**

Don't know

**13%**

Doesn't support action on climate change because the costs will be too high

**11%**

Doesn't support action, regardless of the costs

In your view, would more action by Australia on preventing climate change be mostly good or bad for your health?

**63%**

Good

**6%**

Bad

**31%**

Neutral or do not know

In your view, would more action by Australia on preventing climate change be mostly good or bad for future opportunities for young people?

**52%**

Good

**16%**

Bad

**33%**

Neutral or do not know

## Climate Solutions

**Q:** We asked people living in the seat of **Warringah** what solutions they'd like the Government to take to help Australia achieve deeper cuts to greenhouse emissions in the next decade.

### These are the top local solutions:

1

Invest in clean transport - more electric buses and trains, and a national network of electric vehicle charging stations

19%

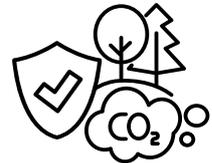

2

Replace gas and coal-fired power stations with renewable energy and battery storage

19%

3

Introduce stronger federal laws to make forests, soils and native vegetation healthier and able to store more climate pollution

17%

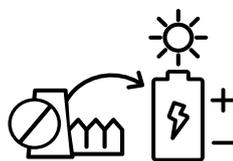

4

Power all government buildings - schools, libraries, hospitals - with renewable energy

15%

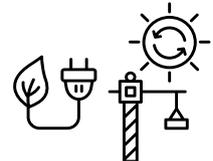

5

Only allocate public money to support renewable energy and battery storage projects, and not coal and gas projects

9%

6

Make products for export such as steel, aluminium and hydrogen using only renewable energy

9%
