Kaupapa Māori

By Māori, for Māori

The Green Party will support Māori to make decisions about the destiny of their own whānau, hapū and iwi.

Tangata Whenua lived undisturbed for centuries as hapū, creating tikanga and protocols unique to the whenua, with the central focus being the health and sustainability of their whakapapa. Supporting ongoing kaupapa Māori approaches for Māori to fulfil their aspirations was affirmed and guaranteed by Te Tiriti o Waitangi and provides better outcomes for all who live in our country.

When Te Tiriti o Waitangi was signed, it was assured that the relationship between Tangata Whenua and the Crown would mean no change in the way Māori choose to live their lives. However, successive governments continue to implement harmful actions which have eroded Māori social structures, contributed to the loss of traditional knowledge, and created intergenerational inequities across many key metrics in Aotearoa, New Zealand.

The current Governments legislative assaults have targeted tangata whenua from all sides; Health, Justice, Tamariki, Education, Social services, and Te Tiriti o Waitangi. They have consistently ignored independent experts, the Waitangi Tribunal, and their own advisors, who have warned that their actions will only deepen existing inequities for Māori and contribute to further racial divide within the country.

It is time to remove the burden from Māori to keep reminding the Crown of their promises and for the Crown to take accountability for their ongoing injustices against te Tiriti and using te iwi Māori as a political football.

The Green Party support tangata whenua-led processes, actions and decision-making by devolving power and investing resources in all matters that affect Māori. We know that Te Tiriti and democracy are not contradictory, they are complementary. Decision-making with iwi, returning whenua to its kaitiaki, and facilitating by Māori, for Māori solutions to target inequities and minimise disparities are all ways we can uphold te Tiriti while honouring the democracy this country should have been built on.

Our plan

- ✧ Devolve power and redistribute resources back to tangata whenua in recognition that Māori are the decision makers and facilitators of the destiny of their own whānau, hapū and iwi.
- ✧ Invest in outcomes that minimise the disparities and inequities tangata whenua face across the majority of social and economic outcomes.
- ✧ Resource marae through a Marae Resilience Fund for Māori to lead initiatives for their people, wāhi tapu, and whenua in accordance with their own tikanga. Create ongoing funding for provisions for civil emergencies in recognition of being consistent community lifelines.
- ✧ End Perpetual Leases on Whenua Māori and amend the Public Works Act 1981 to prevent the acquisition of Māori freehold land, Māori Customary land, and lands within a reasonable proximity to marae, urupā, and wāhi tapu.
- ✧ Expand the learning, speaking, and the promotion of te reo Māori in both formal and informal settings to encourage the widespread use of the language nationwide.

Children

Thriving tamariki and rangatahi

The Green Party will work to build a system that puts tamariki, rangatahi and whānau first.

Tamariki Māori are disproportionately impacted by a child protection system that excludes meaningful partnership and underinvests in culturally grounded, whānau-led solutions. Whakapapa and identity must be centred with whānau and hapū resourced to lead decisions affecting their tamariki. We reflect our commitment to Te Tiriti o Waitangi by addressing the inequities tamariki Māori face in everyday life and in the state care system.

Our plan

- ✧ Prioritise workforce safety by ringfencing training and workforce development strategy prioritising Māori, Pacific, Rainbow, Disabled, and community provider pathways.
- ✧ Amend the Oranga Tamariki Act so that it protects tamariki Māori and explicitly embeds whānau participation in decision-making to exercise iwi/hapū authority.

Climate action: emissions reduction

**Bold action and solutions that hold
polluters to account**

A Green Government would focus on Te Tiriti o Waitangi-based solutions which address the climate crisis by tackling its root causes and removing economic incentives that encourage and enable climate pollution.

Climate action: resilience + adaptation

Keeping Aotearoa safe and prepared

The Green Party will prepare all New Zealanders for the impacts of climate change.

Climate change is one of the biggest challenges of our time and the impacts are already being felt by communities all around the rohe. Severe weather, with more frequent flooding, and more frequent droughts, already are having devastating consequences. Often, marae and community groups are on the front lines of the emergency and clean up response, but these groups are not supported by the Government to adequately plan for adaptation. People who are worried about rising insurance prices due to living in areas exposed to floods or slips have not received any clarity from the Government as to the help that will be provided when disaster strikes, or when the areas where they live becoming increasingly unliveable.

Our plan

- ✧ Ensure climate adaptation planning affirms tino rangatiratanga and upholds the mana motuhake of whānau, hapū and iwi over whenua, wai, and taonga, by appropriately funding a Māori Climate Resilience Fund.
- ✧ Establish a dedicated fund for central and local government to implement climate adaptation and resilience measures, including funding for partnerships with tangata whenua and community organisations.

Conservation + biodiversity

Protecting and restoring plants, animals and ecosystems

The Green Party will protect our precious whenua and taonga species from corporate exploitation.

Aotearoa is home to natural taonga found nowhere else in the world, with our ngahere, awa, and moana central to our national identity and way of life.

Over this term, the Luxon Government has made it easier for corporations to plunder our moana and tear up the whenua—putting private profits ahead of our precious native wildlife. Meanwhile, many of our native plants and animals are on the brink of collapse, and without urgent action, we're at risk of losing them forever.

The Green Party are committed to protecting 30% of land and oceans by 2030 because we know the mauri and health of te taiao is foundational to the wellbeing of our people, our climate, and our communities. We will achieve this by giving effect to Te Tiriti o Waitangi and recognising tangata whenua as the original and ongoing kaitiaki of Aotearoa.

Our plan

- ✧ Reform conservation and wildlife protection laws to give effect to Te Tiriti o Waitangi, prioritise indigenous-led land stewardship, and to ensure the conservation management system prioritises halting and reversing nature loss in New Zealand.

Democracy

Politics for people, not big money

The Green Party is committed to a democracy that upholds te Tiriti o Waitangi and the vision of Matike Mai, creating a decision-making process that reflects genuine partnership.

Our plan

- ✧ Resource a national conversation for constitutional transformation that upholds He Whakaputanga me Te Tiriti o Waitangi as our founding constitutional documents, utilising Matike Mai to facilitate community discussions.
- ✧ Entrench the Māori electoral seats to guarantee Māori representation in Parliament and extend the time in which Māori can switch rolls.

Digital technology

Technology helping, not harming

The Green Party will hold digital platforms accountable to protect us and our information.

Data centres running AI models are sucking the world's energy and clean water sources dry. Intellectual property is exploited by unaccountable platforms, that for Māori are also a source of cultural theft and distortion. Companies from social media giants to those storing our health records collect more information about us while proving that they can't be trusted with it.

Our plan

- ✧ Adopt and implement Te Kāhui Raraunga's Māori Data Governance Model and Māori AI Governance Framework across the public sector to protect Māori data sovereignty

Disability

An accessible Aotearoa for all

The Green Party will build an Aotearoa where disabled people are valued, where they and their whānau live with dignity and autonomy.

Our current laws, policies, and social norms mean disabled people are often denied the same rights as others and are excluded from places and activities non-disabled people take for granted. These barriers are often worse for tāngata whaikaha Māori and for disabled people from marginalised communities.

The current Government has made it harder for disabled people to access the support they deserve and that enables them to participate equally in life and their communities.

The Green Party is ambitious in its plan to create a more accessible Aotearoa by building off the Enabling Good Lives framework and grounding our approach in Te Tiriti o Waitangi. Our approach will operate on a high-trust model and apply to all disabled people, including those with disabling conditions that do not currently access support.

Our plan

- ✧ Introduce a Tiriti-based disability rights law with enforceable accessibility standards.

Drug law reform

Putting health first to keep people safe

The Green Party will take an evidenced, health-based approach to alcohol and other drugs to reduce harm in our communities.

Our plan

- ✧ Ramp up funding of harm reduction and addiction support for people who want to reduce their drug intake, including through kaupapa Māori, Rainbow, youth, and harm reduction programmes.
- ✧ Enable a licensing system for psychedelic treatment and recognise taonga status of our native psilocybin species.
- ✧ Phase out all alcohol advertising and sponsorship, including at sporting and cultural events and use funding from the alcohol levy to establish a well-resourced national harm-reduction campaign.
- ✧ Implement stronger regulation for vape retailers to protect young people and children, including by restricting maximum nicotine concentrations, restricting flavours, and keeping vape stores out of the vicinity of schools and kura.

Education

An Aotearoa where everyone can reach their full potential

The Green Party will support an inclusive education system that uplifts everyone.

The Green alternative is grounded in Te Tiriti o Waitangi and universal human rights. A Tiriti centred education system honours tino rangatiratanga, embraces te reo Māori and mātauranga Māori, and ensures Māori voices and communities are central to decision making. Inclusion is not an add on but a foundation. Disabled people, rainbow communities, migrants and refugees, and others facing structural barriers are fully supported to learn, belong, and thrive. Educators' voices, and grounded expertise are central to decisions at all levels.

Our plan

- ✧ Reset the government's rushed and ideological curriculum and assessment reforms, reverting to the original direction of Te Mātaiaho and ensuring qualification reform follows curriculum reform
- ✧ Expand Ka Ora, Ka Ako to 400 more schools, as a first step towards providing a warm and nutritious locally made lunch to all school children.
- ✧ Support rangatiratanga to provide an education system driven by whānau needs, allowing space for whakapapa-based decisions, and working towards a Māori Education Authority governing and funding all Māori Medium and Kaupapa Māori education.
- ✧ Support the workforce so all teachers and educators have fair wages, staffing levels that support quality teaching, and co-develop a long-term workforce plan with the sector.

Energy

Powering Aotearoa with affordable renewable energy

The Green Party will fix our broken power system so that people, not profits, come first.

The Green Party will speed up the electrification of our energy system and fix the rules of the energy market so public wellbeing comes before corporate profits. We will grow renewable generation, like wind and solar, support community and Māori-led energy projects, and improve energy efficiency so homes are warmer, bills are lower, and communities have more control of their power.

Our plan

- ✧ Increase resilience by enabling greater distributed solar and batteries for households, marae and suitable public buildings, and supporting community-led energy planning
- ✧ Establish a single energy regulator, and a Ministry for Energy, focusing on affordable, secure and sustainable energy with equitable access and Tiriti-based frameworks that enable Māori and community involvement, ownership, and leadership in energy projects.

Environmental protection

Protecting and restoring nature

The Green Party stands for a healthy environment as the foundation of healthy communities.

Luxon's coalition has been the most environmentally damaging Government in a generation. They have fast-tracked destructive mining projects in wild places, scrapped our Ministry for the Environment, changed laws to more easily allow the killing of native wildlife where it stands in the way of development, and allowed rivers, lakes, and groundwater to become more polluted. Environmental laws have been gutted, alongside the dismantling of processes for shared decision making that honours Te Tiriti. Luxon's Government has prioritised private profit at the expense of our environment.

The Green Party stands for a healthy environment as the foundation of healthy communities. The Green Party will strengthen environmental protections, uphold Te Tiriti, and restore te taiao. Protection and restoration of our environment is the foundation of our future.

Our plan

- ✧ Implement strong evidence-based limits for ecosystem health, secure the role of Te Tiriti, and affirm the role of tangata whenua as shared decision-makers and kaitiaki in the new resource management system.
- ✧ Repeal the Fast-Track Approvals Act and revoke consents for fast-track approvals for new coal, gold and seabed mining projects.

Food, fibre and forestry

A regenerative approach that puts people and nature first

The Green Party will support sustainable farming and forestry that protects our environment, communities and livelihoods.

We can have a thriving, sustainable food and fibre sector that prioritises mātauranga food production, creates food security, keeps our waterways healthy and provides good jobs for our rural communities.

Our plan

- ✧ Work with Māori led forestry organisations to support investment in forestry and restoration of forests on whenua Māori and recognise tangata whenua customary use rights in indigenous forestry according to their tikanga.
- ✧ Establish a biodiversity credits scheme that supports landowners to undertake restoration and protection of land, as a voluntary revenue alternative to the Emissions Trading Scheme, and prioritise marginal whenua Māori where agreed by landowners.

Freshwater

Healthy water for drinking, swimming and gathering kai

The Green Party will put the health of freshwater and communities first.

Our rivers and lakes should be healthy, clean, and teeming with life. Everyone should be able to turn on their tap knowing their water is safe to drink, swim in their local awa without getting sick, and fish or gather kai from waterways. Clean healthy freshwater is the foundation of the health of our people and our environment.

Our plan

- ✧ Reinstate Te Mana o Te Wai to prioritise the health of freshwater in decision-making and regulation and to give effect to Te Tiriti o Waitangi.

Gender equity

For a more equal Aotearoa

The Green Party will take action to advance gender equality and ensure women and gender minorities are respected and treated fairly.

Our plan

- ✧ Fund one-stop-shops that provides pā harakeke wrap-around services for whānau throughout hapūtanga, after birth, first stages of life, and navigating parenthood.
- ✧ Resource kaupapa Māori solutions and community-led solutions to family and sexual violence, that have have been developed by disproportionately impacted groups, including women, Pasifika, rainbow, and disabled communities.
- ✧ Enact the recommendations from the Mana Wahine Inquiry when they have been determined.

Global affairs + trade

A safer, greener, fairer future for people and planet

The Green Party will ensure that Aotearoa always stands up for what's right on the world stage.

Our plan

- ✧ Support Pacific sovereignty and independence and oppose the militarisation of the Pacific.
- ✧ Implement the Trade For All agenda, including democratic scrutiny of trade agreements, and enforceable recognition of our Te Tiriti o Waitangi obligations, workers rights, human rights and climate commitments.
- ✧ Stand with decolonisation and democracy movements globally in particular with indigenous peoples of our Asia Pacific region.

Health

Accessible care to support everyone's health

The Green Party will ensure our health care system is equitable, accessible and properly supported.

Undoing actions of redress for Māori such as the disestablishment of Te Aka Whai Ora - The Māori Health Authority, removing requirements for culturally safe care, and stripping power from iwi-Māori Partnership has not only reversed decades of progress to provide equitable healthcare after decades of neglect, but continues to force Māori into a health system that is known to underserve them and is misaligned with their hauora aspirations.

Private provider costs are locking whānau out of accessible primary health care which causes health issues to unnecessarily escalate because they are not detected early. Meanwhile, Hauora Māori and social service providers that are focused on whānau-wide holistic and preventative care remain underfunded and restricted by overly prescriptive contracts.

Good health and dental care allow all of us to live enjoyable, meaningful lives. Our plan will expand access to essential primary care and dental, and work with and fund kaupapa Māori approaches to end health inequities in the system, and prevent ill health and mental distress in the community.

Our plan

- ✧ Fund mobile healthcare and mental health care clinics, diagnostics services and dental vans to ensure rural communities are able to access health services regularly, including during and after civil emergencies.
- ✧ Work towards a publicly delivered, fully free provision of dental and primary care services, including by-Māori for-Māori community clinics contracted through a redeveloped Te Aka Whai Ora.
- ✧ Stop overly prescriptive Hauora service contracts and commit to working with Iwi Māori Partnership Boards and Hauora Māori to simplify and improve funding arrangements for providers of health services for whānau, hapū iwi and hapori.

Housing

Safe, warm, affordable homes for everyone

The Green Party is the only party with a credible plan to ensure everyone can afford a warm and safe place to call home.

Our plan

- ✧ Build tens of thousands of new public homes, significantly increase accessible public housing stock, and fund more papakāinga to be built on whenua Māori.
- ✧ Require Councils to collaborate with communities, including mana whenua, to provide sustainable, walkable, mixed-use urban areas and enable enough new affordable homes within existing urban areas to meet the needs of the next generation.

Immigration + refugees

Welcoming, safe and fair pathways to make Aotearoa home

The Green Party will make sure that everyone who comes to Aotearoa is treated with respect and dignity.

Our plan

- ✧ Implement Māori aspirations for a Tiriti-based immigration system, including devolving resources and decision making to hapū and iwi to strengthen traditional whanaungatanga connections, and providing Tiriti education to new migrants and refugees.

Justice + community safety

Keeping communities safe through prevention and rehabilitation

The Green Party will make our communities safer by addressing the drivers of crime.

Our plan

- ✧ Expand Te Ao Mārama to all Courts in Aotearoa and ensure specialist youth courts including the Rangatahi and Pasifika Courts, Alcohol and Other Drug Treatment Courts, and New Beginnings Courts are available to all who wish to access them.

Local government

Empowering local democracy

The Green Party will back local government to deliver community wellbeing.

Our plan

- ✧ Reinforce councils' responsibility to Te Tiriti o Waitangi by making the role of local government as a Tiriti partner explicit, and reinstate their ability to keep Māori wards for their districts.

Mental health

A safe, supportive and accessible care system

The Green Party will work to address the drivers of poor mental health, and ensure everyone can get safe, culturally relevant care when they need it.

The Green Party will expand free services so cost is never a barrier to accessing support, and provide more funding to kaupapa Māori and youth services so support is culturally relevant to our communities. The mental health workforce will receive more support, staffing and funding to reduce burnout and allow for the phasing out of harmful practices like seclusion, to ensure acute mental healthcare is rehabilitative, not harmful.

Our plan

- ✧ Expand free mental health services to all communities so everyone can access support when they need it, including expanding youth services like Piki, Mana Ake and Youth One Stop Shops throughout Aotearoa, Asian Family Services, and dedicated support for post-natal mental health.
- ✧ Implement the recommendations of Every Life Matters – He Tapu te Oranga o ia Tangata suicide prevention strategy, together with further actions identified as part of the kaupapa Māori response to suicide prevention with particular focus on people under 24.
- ✧ Fund kaupapa Māori mental health and addiction programmes and ensure rangatahi Māori voice is represented in policy.

Oceans and fisheries

Abundant oceans teeming with kaimoana

The Green Party will restore the mauri (life force) of our moana through bold marine protection initiatives.

Aotearoa's moana is a taonga and New Zealanders deserve to have healthy and thriving oceans, with abundant marine life that provides for sustainable kaimoana. Oceans are the lifeblood of our planet and our largest public good—an abundant ocean belongs to all of us.

The Green Party will put Te Tiriti o Waitangi at the centre of our approach to restoring the abundance of our moana, because when we invest in local knowledge, we get closer to restoring the right of every New Zealander to gather kaimoana and find abundant life in our seas for generations to come.

Our plan

- ✧ Protect at least 30% of New Zealand's ocean territory by 2030 through reforming marine protected areas legislation to ensure it is fit-for-purpose and enabled Tiriti-consistent and tikanga-led tools and approaches to improve ocean health outcomes.
- ✧ Ban seabed mining in the coastal marine area and the exclusive economic zone; and maintain pressure for a moratorium on seabed mining in international waters.
- ✧ Review the Quota Management System and move towards an ecosystem-based fisheries management model, in line with the Māori fisheries settlement.
- ✧ Resource iwi and hapū to lead ocean protection by embedding kaitiakitanga, tikanga, and mātauranga in policy operational management and ocean conservation projects.

Overseas New Zealanders

Cultivating Kiwi connections around the world

The Green Party will ensure all New Zealanders living overseas can feel connected to home.

Our plan

- ✧ Enable a tikanga-based pathway for people who whakapapa Māori to establish Aotearoa New Zealand citizenship, regardless of country of residence or birth.

Public services

Strong essential services accessible to everyone

The Green Party will make sure that public services support the public good.

Strong public services also require a strong, capable, and independent public sector anchored in its commitment to upholding Te Tiriti o Waitangi. A Green Government would connect services to communities, ensure they are grounded in equity, and able to look beyond short-term political cycles to support the long-term public good.

Aotearoa has enough to properly invest in the services and infrastructure everyone relies on and to ensure these services stay in public hands. With political courage, an active state, and enhanced democratic accountability, we can build public systems that support wellbeing, uphold Te Tiriti, strengthen our national resilience, and give every community what it needs to thrive.

Our plan

- ✧ Uphold te Tiriti o Waitangi throughout the work of the public service, and fund Māori organisations, iwi, hapū and marae to run community and environmental initiatives that meet the needs and aspirations unique to their rohe.
- ✧ Improve training in te Tiriti o Waitangi and te reo Māori for all public servants, resulting in consistency across all agencies.

Rainbow communities

Rainbow communities thriving with freedom, equality and respect

The Green Party will nurture an Aotearoa where everyone belongs and enjoys a safe, healthy and happy life.

The Greens believe that rainbow healthcare should be shaped by compassion, evidence, and aroha, not fear or political division. Rainbow identities are connected to whakapapa and whānau and it is essential that government enables these relationships to thrive. A fair society must recognise and address the overlapping barriers to a healthy life faced by Rainbow Communities, particularly where intersectional identities such as Māori, Pasifika, disabled people, migrants and refugees further compound those challenges.

Our plan

- ✧ Working with the different Rainbow communities to develop appropriate healthcare services and strategies built on cultural values and holistic models of care and wellbeing.
- ✧ Increase resourcing for Rainbow organisations, including dedicated support for Māori and Pasifika-led organisations, to support the development and delivery of services that reflect the diverse needs, values, and strengths of Rainbow communities.

Seniors

Happy, healthy and supported

The Green Party will uphold the mana of seniors by prioritising the support that enables equitable and fulfilling lives.

Guided by manaakitanga, whanaungatanga, and led by Te Tiriti o Waitangi, we envision communities where seniors are recognised and celebrated as leaders and knowledge holders, actively shaping whānau, hapū and iwi life. Homes are warm, accessible and designed for connection across generations, while community spaces and marae-based centres foster belonging, learning and support.

We believe those who work in aged care must be respected and rewarded, with secure conditions that enable them to provide high-quality, compassionate support. Care systems should be equitable, culturally grounded, and responsive, ensuring Māori, Pacific Peoples and diverse communities can access services that reflect their values and tikanga.

Our plan

- ✧ Launch a dedicated long-term strategy for the needs of an ageing population which encompasses the holistic wellbeing of kaumātua, elder abuse prevention, ensuring income is equitably accessed and sufficient to live comfortably, and the establishment of a state-owned, not-for-profit retirement village scheme.
- ✧ Expanding housing options by building more papakāinga, prioritising kaumātua on social housing waitlists, and ensuring housing designs are suitable for their needs — single-level and warm, with mobility features and room for intergenerational living.
- ✧ Resource Māori, Pacific and migrant organisations to provide kaumātua care that is aligned with their values, cultural practices and tikanga.

Small businesses

Championing small, local enterprise

The Green Party will back local businesses, support sustainable industries and ensure small businesses have a fair shot.

Our plan

- ✧ Continue to invest in community-led regional development with a focus on sustainable building, regenerative agriculture and horticulture, improving low-carbon infrastructure, and iwi- and hapū-led economic activity.

Te Tiriti o Waitangi

Advancing an Aotearoa that embraces Te Tiriti

The Green Party will put Te Tiriti o Waitangi at the heart of a modern Aotearoa founded on real partnership.

We envision an Aotearoa where our governing structures uphold the rangatiratanga of iwi and hapū, providing dignity for all. We can achieve this by demonstrating true partnership between tangata whenua and the Crown as intended by Te Tiriti.

Successive governments have consistently breached Te Tiriti. The resulting harm, lack of accountability and denial of Māori as equal partners mean that the Crown has not upheld its side of the partnership. When Te Tiriti breaches are ongoing, apologies for past harms are not enough.

It is our responsibility to acknowledge, take accountability and put right the wrongdoings committed by the Crown. These have led to worse outcomes for Māori in too many ways. We can't allow government to pretend that everyone is equal in this country when the exact systems that were created to oppress Māori are still operating.

The Green Party understands that He Whakaputanga and Te Tiriti are the foundation for an enduring constitutional partnership. We acknowledge the need for ongoing dialogue to build the awareness, understanding and vision that will give life to Te Tiriti in Aotearoa.

Our plan

- ✧ Amend the Treaty of Waitangi Act to recognise that Te Tiriti is the authoritative text and that Te Tiriti works in conjunction with He Whakaputanga o te Rangatiratanga o Nu Tirenī.
- ✧ Implement genuine Te Tiriti-based decision-making models across government and resource iwi and hapū to participate as partners rather than as advisors.
- ✧ Reform the Treaty Settlements process by amending the settlement policy guide for negotiators to enable fair negotiations and just reparations without cessation of sovereignty, removing any clauses that refer to 'Full and Final settlement', ending the 'large natural grouping' approach to Treaty settlements, and validating hapū rangatiratanga.
- ✧ Increase resourcing for the Waitangi Tribunal, providing them with the power to make binding recommendations for the return of Crown and Private land to iwi, whānau and hapū.
- ✧ Facilitate the return of whenua outside of Treaty Settlements that was wrongfully alienated from tangata whenua, including through exploring a right-of-first-refusal process that enables the return of private land to iwi, hapū and whānau at point of sale.

Tertiary education

Opportunities for everyone to learn and grow

The Green Party will support student success by overhauling tertiary education.

Our plan

- ✧ Ensure all tertiary institutes uphold Te Tiriti o Waitangi and deliver equitable outcomes for tauira Māori (Māori students). Expand the Māori and Pasifika Trades Training programme, and fully resource Whare Wānanga to increase opportunities for kaupapa Māori education.

Transport

Easy, sustainable ways to get around

The Green Party will invest in modern, sustainable, and affordable transport options.

Our plan

- ✧ Fund on-demand public transport, including by-Māori for-Māori public transport to serve kōhanga reo and rural schools. Fund affordable, reliable, interregional rural bus services.

Violence prevention

Keeping whānau and communities safe

The Green Party will make sure everyone can live a life free from violence and heal from trauma.

The Green Party will invest in stopping violence before it starts. Our approach will be safe, accessible and integrated, building on people's strength and with Te Tiriti o Waitangi at its heart. We will mobilise our communities to help and ensure our workforce is skilled and culturally competent.
