Note: Shipping/handling charges are NOT included in the lesson price. An estimated shipping amount is listed because the post office calculates the final cost based on the package's weight and destination ZIP code. Because each package varies in size, weight, and destination—and packages must be sealed before they can be weighed—we are unable to determine the exact shipping cost in advance. For invoicing purposes, we use an estimated amount, typically \$7–\$10 for lesson packets and \$20+ for larger boxes. The actual shipping charge may vary based on the package's final weight and destination.
