

# HOUSING JUSTICE

## HOMES FOR ALL: A VISION

Housing is a right not a commodity  
Land is a sacred entity not private property

Non-profit affordable community housing or public housing available to all

Reparations and land rights for First Nations communities

Caps on rent increases, no unjustified evictions, and a right to longer-term leases to ensure renting is secure and affordable

Renters have a right to own a pet, and to make minor changes like painting the walls, putting up shelves and planting a garden

Abolish tax breaks which encourage property investment

A vacancy levy to discourage investors from leaving good homes empty

Community control of neighbourhood planning

Diverse range of co-housing projects to provide alternatives for empty-nesters and counteract social isolation

A fairer system that offers secure housing without taking on a lifetime of mortgage debt
