

PETITION TO THE HOUSE OF COMMONS IN PARLIAMENT ASSEMBLED

WE, THE UNDERSIGNED RESIDENTS OF CANADA, draw the attention of the House to the following:

WHEREAS sexually explicit material — including demeaning material and material depicting sexual violence — can be easily accessed on the Internet by young persons;

WHEREAS a significant proportion of the sexually explicit material accessed online is made available on the Internet for commercial purposes and is not protected by any effective age-verification method;

WHEREAS the consumption of sexually explicit material by young persons is associated with a range of serious harms, including the development of pornography addiction, the reinforcement of gender stereotypes and the development of attitudes favourable to harassment and violence — including sexual harassment and sexual violence — particularly against women;

WHEREAS Parliament recognizes that the harmful effect of the increasing accessibility of sexually explicit material online for young persons is an important public health and public safety concern;

WHEREAS online age-verification technology is increasingly sophisticated and can now effectively ascertain the age of users without breaching their privacy rights;

WHEREAS anyone making sexually explicit material available on the Internet for commercial purposes has a responsibility to ensure that it is not accessed by young persons;

WHEREAS online age-verification was the primary recommendation made by stakeholders during a 2017 study by the Standing Committee on Health;

THEREFORE your petitioners call upon the House of Commons to adopt Bill S-210, Protecting Young Persons from Exposure to Pornography Act.
