

IT'S TIME WE CUT THE PENTAGON

FOR THE PEOPLE, PLANET, PEACE & A FUTURE!

IF WE'RE SERIOUS ABOUT ADDRESSING THE CLIMATE CRISIS,
WE HAVE TO TALK ABOUT THE PENTAGON.

DID YOU KNOW...

- The Pentagon itself is the **world's largest consumer of oil** and causes **more greenhouse gas pollution than 140 nations**
- Just one of the military's jets, the B-52 stratoforess, consumes about as much fuel in **an hour** as the **average car driver uses in seven years.**
- The U.S. maintains over **800 military bases** around the world and pollution, contamination, and other forms of environmental harm are found at nearly every base
- The military budget in 2020 was **272** times larger than the federal budget for energy efficiency and renewable energy

**CUTTING THE PENTAGON BUDGET COULD
HELP FUND A GREEN NEW DEAL:**

- Just **11%** of the Pentagon budget —**\$80 billion**—could produce enough wind & solar energy to power almost **128 million** households in the U.S.
- **\$4.5** trillion could fully decarbonize the U.S. electric grid
- Just **1%** of the Pentagon budget could fund **125,000** green jobs

IF YOU'RE READY TO
#CUTTHEPENTAGON FOR THE
PEOPLE, PLANET, PEACE
& A FUTURE:
JOIN US!

WAR IS
NOT
GREEN!
