

NO MORE ENDLESS WAR!

Will the war in Ukraine turn into another endless war like the U.S. wars in Iraq and Afghanistan? How many Ukrainians must die and be displaced?

That depends on whether the United States and its allies support a negotiated solution.

THIS WAR SHOULD BE A GLOBAL WAKE-UP CALL.

The terrifying war in Ukraine should propel us to implement the UN ban on nuclear weapons and move from reliance on fossil fuels to green energy. Instead of war, let's all cooperate to build a peaceful and sustainable world for all our children and grandchildren.

So far, U.S. leaders have urged Ukraine to keep sacrificing its people, using U.S. weapons paid for by our tax dollars — \$5.3 billion and counting since 2014.

THE U.S. CAN SUPPORT PEACE IN UKRAINE BY:

- Agreeing to lift sanctions if Russia keeps its side of a peace agreement.
- Committing humanitarian assistance to Ukraine instead of more weapons.
- Ruling out further escalation of the war, such as a "no fly zone."
- Agreeing to end NATO expansion and committing to renewed diplomacy with Russia.

The U.S. military spending is 12 times that of Russia. That they failed to prevent this war should signal the urgency of radically reordering our priorities from wasted weapons spending to the needs of our people and planet.
