

THE WAR ECONOMY BEHIND MIGRATION

U.S. INTERVENTION FEELS MIGRATION

MONOPOLIZE
U.S. military operations destabilize countries in order to monopolize natural resources, especially throughout Latin America and the Caribbean.

SANCTION
If a country resists U.S. intervention, they face deadly sanctions and military occupation. These resource grabs are disguised as fighting for "democracy" or against "drugs."

DESTROY
These operations collapse economies, spread violence, and create deadly living conditions, leaving millions of people with no other option but to flee their homelands.

CRIMINALIZE

The same government that creates displacement then funds ICE to hunt, detain, and deport the people its policies have displaced

THE CONSEQUENCES
ICE has disappeared thousands of people, including children and the elderly. In the past year, dozens have died in ICE detention while ICE agents murder with impunity in the streets.

ICE isn't just stealing people off the streets, but they are stealing our financial resources.

ICE's budget is so large that it ranks among the top 10 most funded militaries globally, at \$77 billion.

HOW MUCH IS \$77,000,000,000?
