

STOP THE WAR ON VENEZUELA!

Trump is threatening military strikes and regime change in Venezuela, putting us on a path towards another endless war.

THE PRETENSES:

- Drugs: Venezuela doesn't produce or traffic fentanyl. It produces zero cocaine and only 5% of the global cocaine trade transits the country.
- Narco-terror: US intelligence agencies admit the Venezuelan government views the Tren de Aragua as a "security threat" and calls reports it directs TDA activities as "not credible." In its yearly National Drug Threat Assessment reports, the DEA has never written a word about the Cartel de los Soles - it is a fiction.

THE REAL REASONS:

- Venezuela has the most oil reserves in the world and has dared to challenge U.S. foreign policy.
- The election of President Chávez in 1998 sparked the Bolivarian Revolution, which created a mass working class coalition to defeat capitalism and imperialism.

THE WAR ALREADY STARTED:

- Democracy: Did you know the Venezuelan opposition never challenged the 2024 presidential election in courts? Did you know they burned the ballots of their primary to prevent an audit?
- Human rights: Maria Corina Machado won a Nobel for calling for an invasion and sanctions, then she thanked Trump and congratulated Netanyahu for the genocide in Gaza. On the other hand, Venezuela built 5 million homes for working class families, prevented a famine through grassroots organizing, welcomed migrants, and broke off relations with Israel in 2009.

- The US economic and hybrid war has killed tens of thousands of Venezuelans every year since 2017.
- USAID programs induced mass migration, only for Trump to revoke TPS and visas, unleash ICE on migrants, and send Venezuelans to be tortured in El Salvador.

WE'RE NOT ALONE! ONLY 30% OF VENEZUELAN SUPPORT WAR. POLLS SHOW US CITIZENS REJECT AN INVASION.
