

Enough is enough.

Now is the time to come together to stand up and shut down the war economy.

We are outraged at the ICE takeover of our cities and the kidnapping and killing of our neighbors, just as we are at the criminal war on Iran, the genocide in Palestine, the regime change operations in Venezuela and Cuba, and the ecocide across the planet.

We say no to our tax dollars being spent on war and militarism at home or abroad! No more death and destruction!

On May Day, we are shutting down business as usual and building together towards a national strike. That means no school, no work, no shopping. We are asserting our collective power by bringing the war machine to a halt. This is only the beginning. Onward to peace, justice, & liberation!

SHUT DOWN THE WAR ECONOMY
