Make Georgia the Election Integrity Leader!

Thanks to the leadership of patriotic State Senators, Representatives, and staff of the Georgia General Assembly, the GAGOP Election Integrity Task Force and other members of the Georgia Election Integrity Coalition, the State of Georgia just completed a historic legislative session. Three excellent bills to improve election security, transparency, integrity, and restoring voter confidence, are sitting on the Governor's desk for his signature!

SB 189

- ★ Ensures all physical ballots are subject to Georgia Open Records Request law so election results can be publicly verified.
- ★ Requires all early voting and mail-in ballots received prior to Election Day to be tabulated by 8 p.m. on Election Night to prevent ballot box stuffing.
- ★ Contains additional sign-off and sealing procedures that counties must implement starting next year.
- ★ Gives the Secretary of State two years to eliminate the current voting system that accumulates votes hidden in QR codes.
- ★ Implements clarifications for challenges to clean up voter rolls.

HB 974

- ★ Requires visible security watermarks for ballots so counterfeit ballots can easily be spotted by election workers.
- ★ Requires additional, improved Risk Limiting Audits over the next few election cycles.

HB 1207

- ★ Improves election transparency with meaningful access for poll watchers.
- ★ Provides specific protections for both poll workers and watchers.
- ★ Requires election workers to be U.S. citizens.

The last step is for Governor Kemp to sign these bills into law before May 8th so we need your help once again! He needs to hear from as many Georgia voters as possible regarding these common-sense bills. There is a very large, well-funded, and organized opposition that wants Governor Kemp to veto these bills.

Contact Governor Kemp today and ask him to sign SB189, HB974 and HB1207 into law before May 8. Scan the QR code below to call or chose one of several draft emails of support that will just takes a minute to send!
