Key Issues Facing the District

ECONOMY

- Lower taxes: 300K people left New York State in 2020-2021 alone; we must remain fiscally competitive to retain our population and attract new residents
- Restore SALT deductions: a \$10K deduction cap hurts middle class families in high-tax environments like New York
- Support innovation: as the financial capital of the country, NY-10 should be a hub for innovation in the NFT/Cryptocurrency markets

PUBLIC SAFETY

- Support law enforcement: all New Yorkers deserve safe, clean streets and a fully-funded NYPD
- Accountability: we must restore the relationship between the police and residents
- Gun violence: federal funding must be made available to create innovative partnerships between communities and law enforcement to remove illegal guns from the streets

EDUCATION

- Merit matters: a merit-based admissions process benefits all students, and must be protected
- Curriculum: NYC schools should focus on an academically rigorous, traditional curriculum that prepares its students for the job market instead of divisive and ideologically extreme indoctrination programs
