Union County GOP

RE: Appointment to UCPS Board of Education

Dear Executive Committee Members,

My name is Barry Tucker, and I am looking to be appointed to the Union County Public Schools Board of Education. I am a proud native of Union County, NC. Upon graduating from Piedmont High School, I met my wife Jessica, who is also a graduate from Piedmont. Together, we have raised four beautiful children—Dallas, Jase, Mason, and Georgia Grace – all who attend or will attend UCPS. As an active member of our community, I have dedicated my time to coaching various sports teams in our area. Instilling the same values of teamwork and perseverance that helped guide my own life.

Growing up, I was taught the importance of earning success through hard work, dedication, and discipline. These principles have helped shape my life and career, starting out as a maintenance mechanic at Charlotte Pipe and Foundry and continuing in my current role as the Asset Tracking Manager for Caryl Mechanicals in Indian Trail.

With a strong reputation throughout the Piedmont and Unionville community, I believe that fostering relationships is the key in building a thriving town, county, and state. I am very passionate about working collaboratively with local communities to enhance the well-being of my community while laying the ground work for future generations. Guided by my commitment to leave a lasting, positive impact, I am dedicated to creating a better future for Union County and beyond.

As a member of the Republican party, I think government officials are here to serve the people, not their own personal interest. The country as a whole is being misled by several different policies. As a God-fearing Christian, I know that the country is in disarray and the only way to get it back is through our kids.

Our citizens, constituents, and most importantly, our kids, deserve to have leadership that represents their values. Union County holds strong conservative values, and it's important to teach others these same values. My family and I have been so blessed throughout our life by the people, businesses, and schools here in Union County. I think it's time to give the power of our kids' education back to the local governments and stop trying to force false ideologies on them.
