

WATER IS LIFE

SAY NO TO FRACKED GAS DATA CENTRES

We love the Territory and don't want it destroyed by fracking and water-guzzling, hot, and noisy AI data centres.

Data centres are a trojan horse for NT fracking, which could see 6000 wells drilled through our underground water supplies.

We don't want to be the data centre capital of the globe

we want safe drinking water and a liveable future for our kids.

There is zero community consent for these projects. They are being forced upon us.

Let's not forget that water is free in the Territory. We don't want to see our precious aquifers drained for AI while we get nothing in return.

Tell the Albanese Government to issue an immediate moratorium on fracked gas data centres in the NT until we can properly assess their impacts on our water, climate and the Territory lifestyle.

SAY NO TO FRACKED GAS DATA CENTRES

WATER IS LIFE

DIRTY DOZEN

The Finocchiaro government wants to make the NT the 'data centre capital of the globe' and has signed secret deals for 12 data centres.

BERRY SPRINGS

A 2GW data centre from Beetaloo Energy

185 hectare site on Finn Road - near Territory Wildlife Park and the iconic Berry Springs.

Could consume up to 43.8 billion litres of water annually just for cooling (17,520 Olympic swimming pools)

Estimated power of 1.5-2 million homes annually.

THE BARKLY

A 1GW data centre - Project Ares

186,000 hectare project area on Murrarji Station, south of Katherine

Bigger than the entire Darwin-Katherine electricity grid

Could require 25GL of water per year - equivalent to 10,000 Olympic swimming pools.
