**Your Mission:**

Election fraud is an economic weapon and today's election fraud dirty tricks have become more sophisticated. It is time to recognize the tactics being waged against you. Your mission is to stay alert and educated as it relates to our election process.

Your assignment comes in two parts. This Battle Plan, Part I covers Election Dirty Tricks. Your next mission will cover Part II, electoral theft.

## (OSINT) – Open Sourced Intelligence Briefing

Kevin Freeman - Election Fraud Dirty Trick highlights:

### Tactic and Examples:

**Every election has dirty tricks, both sides do it and it is unfair to all of us.**

There are multiple dirty tricks being used in elections:

1. Telling people the wrong date for an election
2. Sending voters to the wrong polling place
3. Manipulating Google Search Results
4. Hacking websites
5. Fake Facebook pages
6. Fake voter guides

1. **Wrong election Dates to confuse and suppress votes:** In North Carolina a group of pro-Trump supporters sent out voter information with the wrong election date with the goal of confusing the other party.
2. **Manipulating Search Results:** Google and big tech have been manipulating voters and can shift results by millions of votes.

**Dr. ROBERT EPSTEIN BIO:** Author, editor, and longtime psychology researcher and professor—a distinguished scientist who is passionate about educating the public about advances in mental health and the behavioral sciences.

The former editor-in-chief of *Psychology Today*, Dr. Epstein is currently Senior Research Psychologist at the American Institute for Behavioral Research and Technology

"I am not a Trump supporter. I'm not even a conservative. But I love America and Democracy, and I defend truth when I see it, and President Donald Trump is not only justified in expressing misgiving about Google and other tech companies – He seems to have no idea just how big a threat Google, and the gang pose to both democracy and human autonomy." –USA Today Editorial Dr. Robert Epstein

- Epstein goes on to detail different methods big-tech companies can use to shift millions of votes in the midterm election with no one knowing they're doing so without leaving a paper trail for authorities to trace. –Epoch Times

- "Big Tech companies can ... shift ... upwards of 12 million votes, by my calculations. These powerful new means of manipulation make fake news stories and targeted ads, sources of influence that are both competitive and visible, look like kid stuff."

- There is actual evidence of favoritism in Google search results. "Data showed that Google's search results favored Hillary Clinton in all 10 positions on the first page of search results. This is enough to have shifted 2 to 3 million votes in her direction over time." –Dr. Robert Epstein

- "Google employees discussed ways they might be able to tweak the company search-related function to show users how to contribute to pro-immigration organizations and contact lawmakers and government agencies, according to internal company emails." –Wall Street Journal article: John D. McKinnon and Douglas Mac Millan

**3. Fake Facebook Pages:** The Daily Caller Investigative Group found fake Facebook pages were used to suppress GOP turnout. The operation was funded by left-wing tech billionaire Reid Hoffman, who previously funded a "false flag" effort in the 2017 Alabama special election.

**4. Voter Intimidation** – 2008 election with Black Panther group carrying bats and night sticks at the entrance. They appeared to intimidate voters at the polling location, and the Obama justice department did not aggressively pursue.

5. Fake Voter Guides: (A CASE CURRENTLY BEING INVESTIGATED)

6. A recent organized operation was conducted to deceive voters in the mid-term 2018 election. The goal was to cheat and deceive voters by sneaking into church venues and switch out fact-based Vision America Voter Guides with counterfeit voter guides and data.

## INSIDE INTEL - VISION AMERICA

Background on Vision America and why voter guides matter – Vision America provides credible voter guides, footnoted with data for those looking to understand a candidate's position:

- Vision America is a nonprofit association of churches. They serve in political and lobbying areas to impact culture and help provide factual information for the governance for America. Vision America creates non-partisan voter guides.

- 75% of voters stated that non-partisan voter guides as the #1 factor to help them make a decision.
- Distributed to churches and micro targeted to people that have not been active voters.
- Vision America contacts candidates, researches, and documents candidate positions.
- In most churches 50% of the attendees are not registered to vote. Another large group of attendees never turns out to vote even if registered. They are not up to speed on which candidates share their values.
- An engaged church can drive up to a 24% increase in voter participation. This is something that obviously concerned some members of the so-called "Blue Wave." They did not want the truth circulated so they undertook an active deception effort.
- Vision America produced 5 million voter guides and got in front of 5,000 pastors on this last election. In many races, these efforts may have made the difference. They are preparing for an even wider distribution in 2020.

**The Crime against You and Vision America: An organized group produced counterfeit voter guides that match the look and feel of the real Vision America voter guides.**

- Candidate positions were changed, and the footnote-documented candidate positions were removed.
- The perpetrators disguised themselves and went to at least 3 different Texas cities to remove the real voter guides and replace them with misleading counterfeit guides.
- Local, state, and federal voting laws appear to have been violated as they tried to deceive people with the wrong information.

## Why You Should Care:

- » What happens in one corrupt state election can impact all of America. A corrupt Senate election in Minnesota could result in different Supreme Court justices or a different Federal tax rate for you.
- » Social media giants can easily manipulate search terms and data to mislead the public. Combine this with mainstream-media bias and election integrity suffers. Having valid sources for candidate information is critical for an informed electorate.
- » Without election integrity, a national election could be thrown into chaos that destroys the United States.
- » You have a responsibility to help our country maintain integrity in elections. There is more at stake than many realize. A free society requires fairness in elections.
