STOP THE MONEY PIPELINE

Join Babies for Climate Action & For Our Kids North Shore in taking your first step to stop the money pipeline that continues to fuel climate change.

Even as the climate crisis escalates, the big five Canadian banks are STILL pouring money into oil and gas exploration, including particularly damaging projects like fracking and tar sands development. Since the Paris Agreement was signed, RBC has pumped \$160 billion into fossil fuel companies; TD has provided \$103 billion; Scotiabank \$97.5 billion; Bank of Montreal \$82 billion; CIBC \$57 billion.

Join us as we walk you through the steps of emailing your bank to demand change, using templates from Climate Pledge Collective.

April 7, 8pm. RSVP here.
