

Demonstration Garden Watering Instructions

Spigot

Buckets

1. Get the bucket with pocket hoses from the South Stairwell near the Water Garden. (Note: they are at the bottom of the stairwell, under the overhang, inside the box.)
2. Attach the hose to the spigot at the end of the 550 Building. Make sure the ball valve between the 2 hoses is set to "Off."
3. Turn the water on, full, at the spigot. The pocket hose will start to expand once the water is turned on. Bring the end of the hose across the lawn to the fence. Set the end of the hose down so you can reach it from the other side of the fence. Make sure the wand is set to "Off."
4. Turn the ball valve between the 2 hoses "On" so that the second hose starts to fill.
5. Go through the SW gate and around to the park side of the fence.
6. Water the garden for 15 minutes. Use a sweeping motion with the wand set to "Shower." Hint: use the timer on your phone!
7. Turn the ball valve between the 2 hoses to "Off." Let the water drain from the wand side of the hose. The hose will start to shrink, so walk with it back to the fence as it does.
8. Turn the water off at the spigot. Disconnect the 2 hoses to drain the water, then reconnect. Put everything back in the bucket.
9. Return the bucket to the box under the Stairwell (1). Relock the box – it's easiest to hold the lid open while putting the lock through, then closing it.

Demonstration Garden

Watering Instructions - Bonus

Take photos of the Demonstration Garden so we can track growth and any issues.

Photo 1: Capture the side-by-side comparison of the historic and demonstration gardens.

Photo 2: Capture a “front-to-back” view of the historic and demonstration gardens.

Photo 3: Capture a closer view of the demonstration garden plants.

Send photos to info@fotmpdc.org. Please put the date in the file name.
