

FOUR FREEDOMS DEMOCRATIC CLUB

RESOLUTION IN SUPPORT OF A.I. REGULATION LEGISLATION

July 17, 2025,

WHEREAS, the Four Freedoms Democratic Club is committed to the well-being, job security, and prosperity of New Yorkers; and

WHEREAS, the lack of regulations constricting companies that build artificial intelligence pose large-scale societal risks such as cyber-attacks, bio weapons use, and the potential for human extinction; and

WHEREAS, enacting regulations that require safety plans, third party reviews of such safety plans, protections from retaliation against employees for identifying safety concerns, and disclosures of major security incidents would restrict societal risks posed by artificial intelligence; and

WHEREAS, New York Assembly Bill 6453, the Responsible AI Safety and Education Act or the RAISE act, would enact these regulations to restrict societal risks posed by artificial intelligence.

THEREFORE, BE IT RESOLVED THAT the Four Freedoms Democratic Club supports the passage of New York Assembly Bill 6453; and,

BE IT FURTHER RESOLVED THAT the Four Freedoms Democratic Club urges relevant stakeholders including government officials, community organizations, and the public to take any and all steps to assist in the passage of safety regulations of artificial intelligence for the protection of public safety.

BE IT FURTHER RESOLVED THAT the Four Freedoms Democratic Club urges Governor Hochul to promptly sign the bill that has now been passed by the both houses of the NY Legislature.
