

## **PHYSICAL THERAPIST – MOTION ANALYSIS CENTER**

### **Shriners Children's Northern California**

Help create a brighter, stronger future for the children we serve at Shriners Children's Northern California. We are a family-centered, academic, pediatric medical center located in Sacramento, and the region's foremost provider of specialized treatment for pediatric orthopedics, spinal cord injuries, burns and other pediatric subspecialties.

Shriners Children's Northern California is currently seeking a full-time Physical Therapist to work in our Motion Analysis Center (MAC).

#### **Responsibilities**

The focus of this position will be to perform state of the art physical therapy evaluation, coupled with 3D Motion Capture, in the evaluation and assessment of pediatric patients with complex movement difficulties. This core member of the Motion Analysis Center team will provide clinical support by performing physical examinations, data collection and integration & interpretation of kinematic, kinetic, electromyographic, foot pressure, and clinical data into a comprehensive report for treatment decision making. Duties will also include participation in gait and biomechanics research and providing education to the community and medical staff.

In this position, you'll have the opportunity to collaborate with the interdisciplinary clinical team in the development of evidence-based treatment planning for our patients. Through our dynamic team approach, you'll work with medical staff and the multidisciplinary team to design and implement individualized plans of care to meet the needs of the pediatric patients and their family.

#### **Qualifications**

##### **Minimum:**

- Current CA Physical Therapist licensure (or eligibility) by the California Board of Medical Examiners
- CPR/BLS certification

##### **Preferred:**

- 1+ years of PT experience
- Pediatric experience
- PCS, OCS or NCS

Preference will be given to candidates with experience in pediatric instrumented gait analysis as well as familiarity with Vicon motion capture systems or an M.S. in a related field. Candidates should have a demonstrated interest in biomechanics of human movement, an aptitude for research, and a high comfort level with technology. Candidates should be detail oriented with strong computer skills.

SCNC offers a competitive salary and benefit package including continuing education and professional development opportunities. Other considerations include free parking, team-approached interdisciplinary care, friendly environment and the satisfaction that our patients are receiving the best care available.

Less than 100 miles from 16 ski resorts and a short drive from San Francisco, Lake Tahoe and the wine country, our Sacramento, CA location offers a reasonable cost-of-living, a beautiful California climate and a rich array of amenities, including a variety of museums and galleries, award winning restaurants, premier golf courses, white water rafting and so much more.

The pay range for this position is \$51.85-\$73.20/hourly. Compensation is determined based on relevant experience and department equity.
