Hydroxyl Environmental Inc.

Recently, I was the Real Estate Sales Representative for a young couple looking to buy their first home. We found their dream house on a quiet cull de sac in Newmarket, Ontario. The house was exactly what they were looking for except for one big problem. There was a strong odour in the house resulting from the presence of cats and cigarette smoke.

I had heard about a technology called Odorox® being utilized in the Real Estate Industry and decided to contact Hydroxyl Environmental Inc. to see if they could address this concern. Their representative, Dennis Osborne, recommended using the Odorox® XL3 hydroxyl generators for one week. He assured us after one week of remediation the smoke and cat odours would be completely removed from the home. My clients agreed to go ahead with the proposed solution and purchased the house. After the Odorox® machines were used as directed, my clients and I were amazed at the results. We could not detect the presence of smoke or cat odours anywhere in the house.

I would highly recommend Odorox® to my clients and colleagues when encountering indoor odour issues when buying and selling homes.

Thanks Hydroxyl.

Sincerely,

Hailey Dewar
Sales Representative
