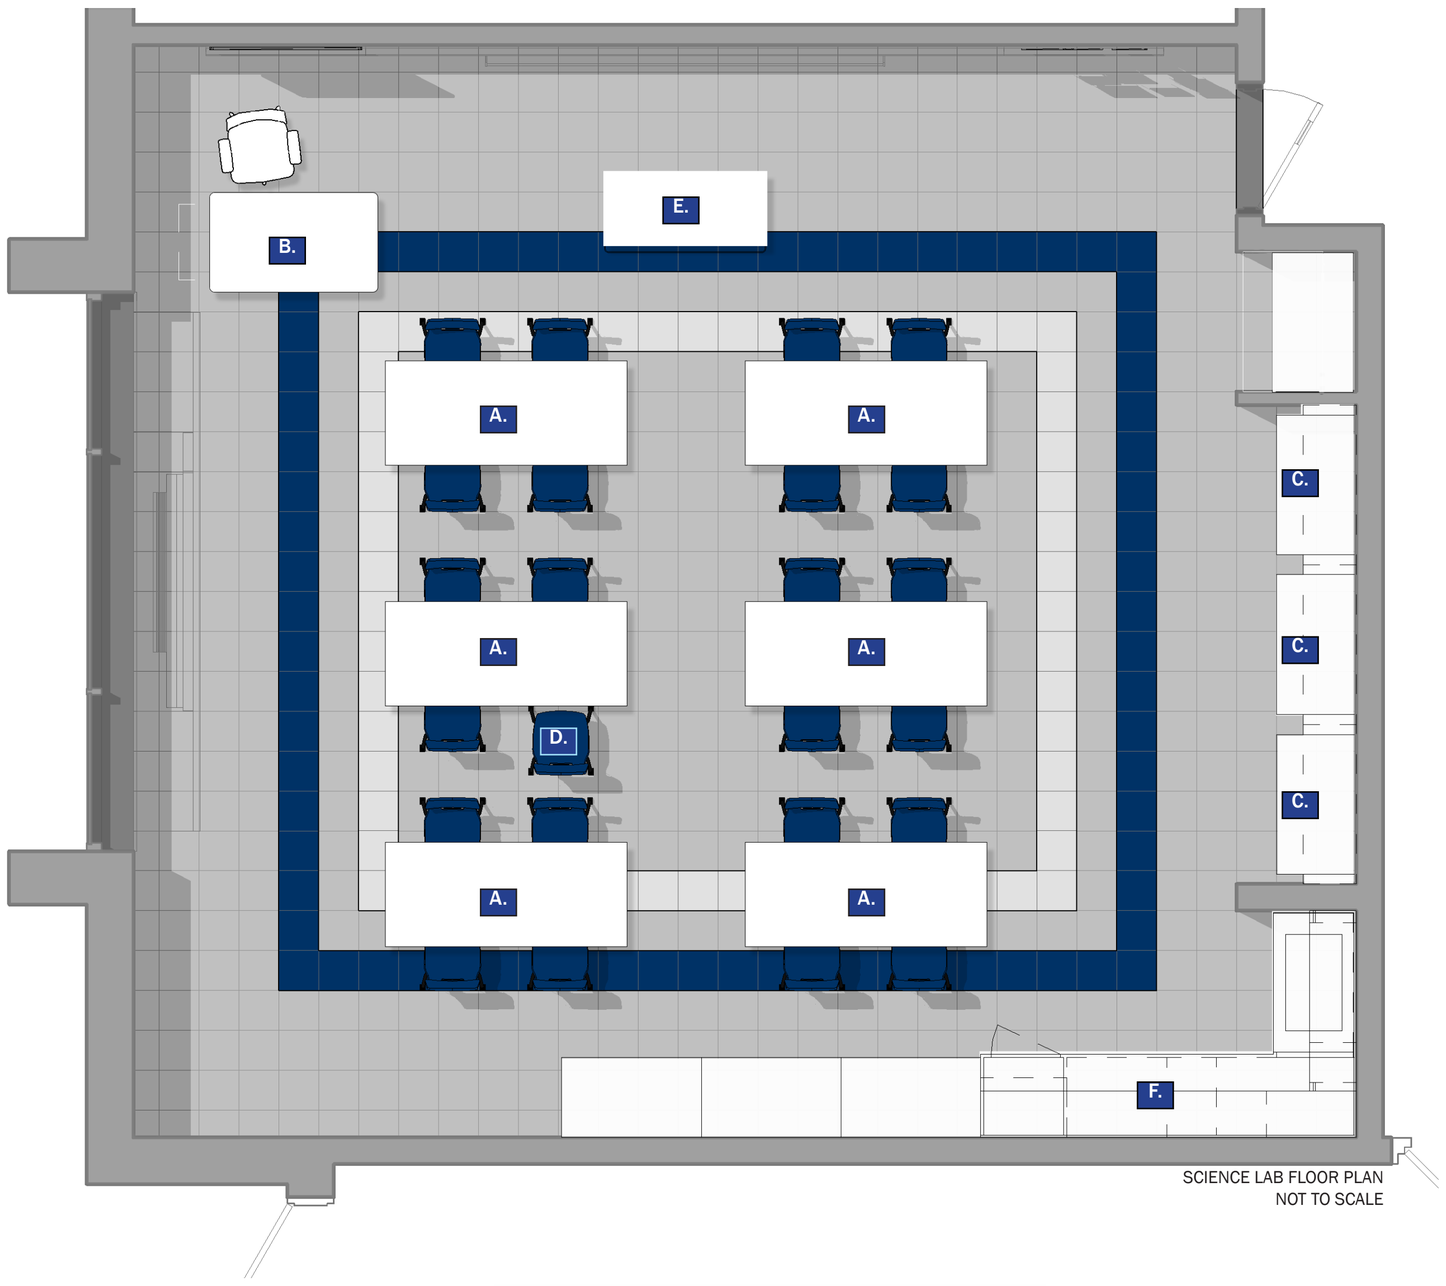
SCIENCE LAB

SCIENCE LAB



SCIENCE LAB FLOOR PLAN
NOT TO SCALE

The Science lab is a cross-disciplinary academic learning commons where students and faculty will gather to learn and connect. This space will have various zones and breakout spaces, for different learning modalities. Digital and print resources will be provided to assist students in researching ideas and concepts and exploring them more deeply. The lab is a zone for students to expirment and execute their ideas.

The space is designed to provides support for general based instruction which includes group and individual activities, directed instruction, and self-paced learning. The lab will be programmed throughout the day to meet the demand of core curriculum instructional needs.

The lab will provide integrated technology in flexible and quickly reconfigurable settings to accommadate a variety of learning opportunities for student exploration. Movable furniture will allow for individual and group projects.
