

NatWest\* lends around  
**£2.3 billion**  
to the nuclear weapon industry.

Airbus, BAE Systems, General Dynamics, Honeywell, Jacobs Engineering, Leonardo, Raytheon, and Safran are involved in **building nuclear weapons**.

**No health service can respond** to the medical needs of civilians injured in the first few hours after one nuclear weapon is dropped on a city. The long-term health and environmental consequences of one nuclear detonation, let alone a full blown nuclear war, would be much worse.

**Nuclear Weapons are prohibited**  
by the UN Treaty on the  
Prohibition of Nuclear Weapons

*\*RBS is part of NatWest Group*

Nuclear Weapons present a clear and present danger to life as we know it.

Are you anxious about the recent threats to use nuclear weapons?

So are we.

That's why we're doing what we can.  
Starting with RBS & Natwest.

NatWest Group already prohibits investments in cluster bombs and landmines.

Now it's time to tell them to stop using our money to finance the nuclear weapon industry.
