OPPENHEIMER SHOWS HOW NUCLEAR WEAPONS STARTED. BUT HOW WILL THEY END?
YOU CAN HELP END NUCLEAR WEAPONS.

The risk of nuclear weapons use is the highest it has been in decades. The Doomsday Clock has just been set to 90 seconds to midnight. Nuclear threats and other reckless behavior from nuclear-armed states are elevating the risk that conflict escalates into a global catastrophe. But it does not have to be this way. Ending nuclear weapons is a fight we can and will win, together.

ICAN takes action all around the world, and at different levels, to end these weapons of mass destruction. When you join the movement, we will connect you to the many different ways to get involved, learn about the risks, and join the community speaking out against nuclear weapons.
