

*“Hey guys,*

*Noah’s mom here (Meagan). Noah is super excited to be on a team and to play this year. I wanted to give you some information on Noah if your kiddos or you had questions.*

*Noah has an ultra-rare genetic disorder (FOP). It causes him to grow extra bones and lose mobility. Sometimes he grows them spontaneously but he also grows them when he is injured. That’s why we will be more cautious with Noah. However, we know accidents happen.*

*If you want to try and explain it like this to your little one. Lots of people have allergies and Noah is allergic to falls, bumps and bruises. It can be very dangerous for Noah if he gets hurt. So let’s try our best not to knock him down, swing a bat close etc. but also try and include him.*

*You can text me any specific questions and thanks for educating your kiddos. Excited for a fun season.”*
