Petition Printing Instructions

1. Fill out the first page of the Petition and print using a color printer.

2. Make sure to print “Actual Size” (not “fit”). The printed signature area should have at least – 2.5 inches long for signature, 2 inches long for printed name, and 0.25 inches apart between row lines.

3. The first page will contain red font (paid/volunteer circulator line).

4. You may need to print this page multiple times because some color printers will not print in a duplex mode.

5. You will need to tab at the end of each line in the concise and impartial statement section to add text.

6. Fields are locked to ensure font size and color are correct.

7. You can print the second page one time on the printer and then use a photocopier to get multiple copies.

8. The petitions should be printed front and back on the same piece of paper.
