

THE FUTURE IS NOW - PHASE II

There are still many families in the Kansas City area in need of evidence based treatment for their children on the Autism spectrum. We are confident of this growing demand as indicated by the numbers of families contacting KcATC on an annual basis.

Even with the success of our Phase 1 Hope Capital Campaign, unforeseen reconstruction and mechanical issues while renovating the building required us to reduce the scope of the project and prioritize each area to make sure we could maximize services to as many children as possible and still meet local city and county codes.

We believe now is the time to revisit the many open needs of the Center and initiate a **\$1.2 million Phase II Capital Campaign** to move the building and property confidently into the future. The Phase II capital campaign will complete the remaining areas of the building and surrounding property allowing for the full capacity of the building and property to be realized. Please be a part of this Mission!

"I firmly believe that the painstaking work that the KcATC providers have done with my daughter, Nori, adds up to incremental changes in the wiring of her brain. She is socially engaged, she is vivacious, she is phenomenal. I can scarcely imagine how she would have gotten there without this incredible organization."

- Randy and Lesa Childers

PHASE II - SUMMARY OF PROJECTS

- Classroom and Restroom completion
- Meeting room added
- Kitchen modernization and update of appliances
- Repair and replace concrete side walks and entrance
- Parking lot resurface and striping
- Playground improvements
- Courtyard and playground equipment canopy
- Maintenance free flooring in classrooms
- (MPR) Multi Purpose Room roofing sealed
- Gutters replaced for MPR
- MPR indoor renovations
- MPR Acoustical Treatment
- Solar panels
- Interior walls repaired and repainted
- Donor wall

SCHOOL FUNCTIONS

- Administration
- Circulation
- Classrooms
- Restrooms
- Support
- Unfinished

With your financial support for this project we can ultimately serve more children on the autism spectrum!
