

What Does *Agenda 47* Mean for Manufacturing Jobs

The percentage of our workforce engaged in manufacturing was 45 percent at the end of World War II. In recent years, it has fallen as low as 8 percent. The collapse of our ability to produce what we need as a nation has resulted in skyrocketing costs and in the disappearance of decent-paying working class jobs.

***Agenda 47* will reverse that collapse.**

**Donald Trump has pledged to Make America the world's
greatest "Manufacturing Superpower"**

<https://www.donaldjtrump.com/agenda47>

His America First trade policy, which includes universal base-line tariffs,
will bring manufacturing back to the United States.

His Strategic National Manufacturing Initiative, will make America “the
world’s unparalleled Manufacturing Superpower” and “will revitalize our
forgotten communities by turning them into flourishing hives of industry.”

The construction of ten “Freedom” Cities will be "true frontiers for the
return of U.S. manufacturing, the invention of new industries."

Reverse the "green agenda" which has turned us into a third world
country. Restore our energy independence by creating jobs in both fossil
fuel and nuclear energy production.
