Re: Mountain Valley Pipeline – Southgate Pipeline Project, Project No. NAO-2018-1574 (VMRC 25-0752), SAW-2018-00887

Mr. VanderPloeg:

Please accept the attached comment in support of the Mountain Valley, Pipeline, LLC's proposed Southgate Pipeline Project as it seeks a critical water permit. I am submitting this on behalf of Pipeliners Local 798, a proud trades union representing the nation's most finely skilled and dedicated industry craftsmen.

Our members collected nearly 1,200 signatures on the attached comment in recent weeks because they understand the significant benefits MVP Southgate will provide, including generating critical tax revenue for the region, injecting tens of millions of dollars into the local economy and creating good jobs for the workforce, many of whom are Local 798 members.

Natural gas projects like MVP Southgate are critical to addressing the region's inadequate pipeline capacity, particularly during winter and summer seasons when communities experience peak natural gas demand. When this happens, manufacturers must reduce or stop operating their facilities if the energy supply is lacking. This leaves a significant economic impact, potentially costing millions of dollars per day.

On behalf of North Carolina and Virginia residents, the local workforce and all who urgently need access to more reliable and cost-effective forms of energy, I submit the below comment to urge swift approval of this necessary project.

Sincerely,

Danny Hendrix
Business Manager

Pipeliners Local 798

Re: Mountain Valley Pipeline – Southgate Pipeline Project, Project No. NAO-2018-1574 (VMRC 25-0752), SAW-2018-00887

Mr. VanderPloeg:

I stand among a growing number of industry craftsmen, homeowners, business owners and other community members who support Mountain Valley, Pipeline, LLC's proposed Southgate Pipeline Project as it seeks critical approval from the U.S. Army Corps of Engineers.

Demand for natural gas infrastructure, particularly this project, is clear. Regulators recognize this, and it's not only due to the tremendous economic benefits, but also the project's adherence to environmental safety. MVP Southgate will serve a region historically known for high coal production and consumption, and when comparing coal and natural gas's carbon dioxide intensity, you will generally find that emissions are reduced by 50% when natural gas is utilized at those plants.

Safety and environmental integrity are driving priorities at Local 798, so support for this project does not come lightly. The MVP Southgate project team has demonstrated a commitment to this goal by making hundreds of route adjustments in response to feedback collected during the pre-filing process. These alterations were made to protect streams, wetlands and cultural resources, as well as to minimize – or avoid – potential impacts to sensitive areas. Post-construction plans include the associated facilities being monitored 24 hours a day, 365 days a year using sophisticated computerized systems and around-the-clock personnel.

I support the swift approval of MVP Southgate due to the following project's benefits:

- support good-paying jobs in Virginia and North Carolina to area craftsmen, many jobs belonging to Local 798 members;
- bring hundreds of millions of dollars into the region's economy;
- generate critical tax revenue and trigger commercial activities associated with the development of the pipeline, e.g. hotels, restaurants, retail businesses, and other services;
- help meet the growing need for natural gas in the region by transporting 375M cf/day to markets that need reliable energy.

This infrastructure is a critical investment in the economic and energy future of Virginia and North Carolina that will put local craftsmen to work, make a reliable supply of natural gas

**PIPELINERS
UNION 798**
UNITED ASSOCIATION

available for residents in the region and support carbon emission goals. This is why I ask that you issue necessary approvals for the MVP Southgate Project without delay.

Signed,
