RE: File. LRE-2010-00463-56-A19; Enbridge's Line 5 Straits Tunnel Project Environmental Impact Statement

Dear District Engineer:

Please find a comment below in support of Enbridge's Line 5 Straits Tunnel Project. I am proud to submit this on behalf of Pipeliners Local 798 members, who stand among the nation's most highly trained industry craftsmen. Many of these men and women reside in the region and are ready to work on this critical project.

Our members collected 2,763 signatures on the below comment because they see the growing energy needs of homes and businesses that depend on Line 5 and similar pieces of infrastructure. Several of our members also participated in public hearings during this comment period to voice support for this project.

We recognize Enbridge's demonstrated diligence in maintaining and improving all of its energy delivery systems, particularly the existing Line 5 system in Michigan, where it has operated safely and efficiently for decades. This is in large part why the project has received critical permits, including approvals from the Department of Environment, Great Lakes & Energy.

I thank you for your attention and ask that you stand with our members in helping ensure residents in this region maintain access to reliable domestic energy with the Line 5 Straits Tunnel Project.

Sincerely,

Danny Hendrix
Business Manager

Pipeliners Local 798

District Engineer – Army Corps of Engineers
16501 Shady Grove Road
P.O. Box 10178
Gaithersburg, MD 20898

RE: File. LRE-2010-00463-56-A19; Enbridge's Line 5 Straits Tunnel Project Environmental Impact Statement

Dear District Engineer:

I stand with Pipeliners Local 798 in firm support of Enbridge Energy's Line 5 Straits Tunnel Project. The permitting process for Line 5 already ensured extensive opportunity for review and comment, through which Enbridge repeatedly demonstrated a commitment to maintaining the highest level of safety and environmental responsibility.

Enbridge's proactive dedication to safety includes diligent 24/7 monitoring of the Straits crossing, regular inspections and operating the line at less than 25 percent of its maximum design capabilities to minimize stress on the pipeline steel and enhance safety. In November 2017, the company formally entered into an agreement with the state of Michigan outlining seven actions Enbridge was taking to protect the state's water bodies within the project footprint. The following year, Enbridge announced another agreement with the state of Michigan that put in place enhanced inspection and operations protocols for the project. In the years that followed, Enbridge has continued to work closely with landowners, tribal leaders and safety experts to ensure the safest and most efficient pipeline operation.

There are several reasons why I believe the Line 5 Straits Tunnel Project deserves swift approval from the Army Corps and other decision makers, including:

- Enbridge has a proactive inspection program to monitor the fitness of Line 5, including evaluating the pipe's interior inch by inch every five years using in-line inspection tools that provide detail on par with MRIs in the medical industry;
- All products that enter the pipeline are inspected and treated to prevent corrosion, and the system is operated at a low pressure to minimize stress on the pipe – all in an effort to protect the pipeline and the Straits;
- Over the past several years, Enbridge has paid tens of millions of dollars in property taxes in the state for its energy infrastructure projects, which has been invested in schools, roads and bridges and other important public services;
- The Line 5 Straits Tunnel Project will create good jobs for the local workforce, many of whom include Local 798 members.

The permitting process for Line 5 already ensured more than adequate opportunity for review and comment, through which Enbridge has demonstrated a clear plan with the project to help ensure an uninterrupted supply of reliable, affordable energy to Michigan and the
