Director Richard Rogers
North Carolina Division of Water Resources
1617 Mail Service Center
Raleigh, NC 27699-1617

Re: File No. 20181638; Mountain Valley Pipeline Southgate Project

Secretary Rogers:

Please accept the attached comment in support of Mountain Valley's Southgate Pipeline Project as it seeks the 401 Individual Water Quality Certification. Our members, who represent thousands of the nation's most dedicated and skilled industry craftsmen, collected nearly 1,000 signatures on this below comment in a few weeks from fellow workers, residents, small business owners and other community members who share our concern over the growing need for affordable, reliable energy – particularly in this region.

In addition to the tax revenue and job creation that MVP Southgate is poised to generate, this project's approval is clearly in the region's best interest, as it secures access to domestically sourced natural gas, safely and efficiently transporting it to consumers that need it most.

On behalf of North Carolina residents, the local workforce and all who urgently need access to low-cost forms of energy like natural gas, I ask that you consider the voices on the following pages when discussing the future of MVP Southgate.

Sincerely,

Danny Hendrix
Business Manager
Pipeliners Local 798

Director Richard Rogers
North Carolina Division of Water Resources
1617 Mail Service Center
Raleigh, NC 27699-1617

Re: File No. 20181638; Mountain Valley Pipeline Southgate Project

Secretary Rogers:

I stand with Pipeliners Local 798 in support of the Mountain Valley Pipeline Southgate Project as it seeks key permits from state regulators. This project represents an investment totaling hundreds of millions of dollars in the economic and energy future of Virginia and North Carolina. It is also primed to put American craftsmen in the region to work, many of whom are members of Pipeliners Local 798.

The project not only brings significant economic benefits, including more than \$10 million in tax revenue across the project area and hundreds of pipeliner jobs, it is also being developed with a commitment to mitigating potential environmental impacts. Federal regulators recognize this commitment, and it has influenced their decision to give favorable opinions on the project. FERC staff stated that the project's potential adverse environmental impacts would be reduced to "less-than-significant levels" through implementation of its recommendations.

I support MVP Southgate, and I am advocating during this particular comment period, because this project:

- Invests \$21 million directly in North Carolina's economy, as well as an anticipated tax revenue in the state of \$2 million during construction;
- Supports more than 200 jobs in North Carolina alone;
- Helps meet the spiking need for natural gas in the region, including new natural gas customers served by Dominion Energy North Carolina;
- Has consistently demonstrated a commitment to environmental-sustainable goals by making hundreds of route adjustments in response to feedback collected during the pre-filing process. These alterations were made to protect streams, wetlands and cultural resources, as well as to minimize — or avoid — potential impacts to sensitive areas.

MVP Southgate is a central part of making a reliable supply of natural gas available for residents and small business owners in the region, and it is clear to me that the project will be developed and maintained in a manner that respects the environment and reflects stakeholder feedback. This is why I ask that you issue necessary approvals for this project without delay.
