Gaithersburg, MD 48909-7958

RE: Submission Number HQ3-8BYB-N9DT1; Enbridge's Line 5 Straits Tunnel Project

Dear District Secretary:

Please find the attached comment in support of Enbridge's Line 5 Straits Tunnel Project. I am submitting this on behalf of Pipeliners Local 798 members, a trades union with a rich history of representing the nation's most highly trained industry craftsmen. Many of these men and women reside in the region and are ready to work on this critical project.

Our members collected 1,547 signatures on the below comment – and several also spoke out at public hearings in recent months – because they see the growing energy needs of homes and businesses that depend on Line 5 and similar pieces of infrastructure.

Enbridge's has demonstrated a steadfast commitment to maintaining energy delivery systems to the highest safety standards, and the Line 5 system in Michigan is no exception. This system has operated safely and efficiently for decades, which is in large part why the project has received critical permits, including approvals from this very department.

I thank you for your attention and ask that you stand with our members in helping ensure residents in this region maintain access to reliable domestic energy with the Line 5 Straits Tunnel Project.

Sincerely,

Danny Hendrix  
Business Manager

Pipeliners Local 798

RE: Submission Number HQ3-8BYB-N9DT1; Enbridge's Line 5 Straits Tunnel Project

Dear District Secretary:

I am proud to support Enbridge Energy's Line 5 Straits Tunnel Project as it seeks permits necessary to move towards completion. Through every stage of this process, Enbridge has demonstrated its commitment to maintaining the highest level of safety and environmental responsibility.

Project leaders have established this good reputation by proactively putting in place enhanced inspection and operations protocols for the project while also working closely with landowners, tribal leaders and safety experts to ensure the safest and most efficient pipeline operation. This safety commitment is particularly important in the context of the EGLE, as protocols include diligent 24/7 monitoring of the Straits crossing, regular inspections and operating the line at less than 25 percent of its maximum design capabilities to minimize stress on the pipeline steel and enhance safety. The focus in the end is on mitigating environmental impacts.

I support the Line 5 Straits Tunnel Project during this comment period because the project:

- Prioritizes safety and sustainability, focused on protecting the pipeline workers and area residents and preserving the land traversed by the project;
- Generates critical economic activity: Enbridge has paid tens of millions of dollars in property taxes in Michigan alone for its energy infrastructure projects. This tax revenue is available to be invested in schools, roads and bridges and other vital public services;
- Creates good-paying jobs for the local workforce, many of whom include Local 798 members who depend on a strong industry to continue to provide for their families and support their communities.

I urge this department and other decision makers to support this critical project because, if allowed to move forward, Enbridge will execute its plan to help ensure an uninterrupted supply of reliable, affordable energy to Michigan residents, small business owners and other community members across the region.

Signed,
