

**PIPELINERS
UNION 798**
UNITED ASSOCIATION

September 19, 2025

Ms. Kimberly D. Bose, Secretary
Federal Energy Regulatory Commission
888 First Street NE
Washington, DC 20416

RE: LETTER OF SUPPORT: Critical Energy Reliability Link Project, FERC Docket No. CP25-539-000

Dear Ms. Bose:

Please find the attached comment with 4,277 signatures supporting Tallgrass Energy's natural gas infrastructure investments in Colorado, namely the Critical Energy Reliability Link Project. I'm submitting this on behalf of Pipeliners Local 798, a proud trades union representing the nation's most highly skilled and trained industry workers.

Our members worked to collect these signatures to support the project because they recognize how it will address the urgent need for reliable, affordable natural gas. This project is designed specifically to address this challenge of energy reliability, and construction will provide an immediate impact, creating good jobs for industry craftsmen – with an estimated \$131 million in wages and benefits expected for local workers. We are also encouraged to see that Tallgrass Energy intends to hire Union labor on this project, which demonstrates their commitment to quality and safety, as well as fair wages for American workers.

On behalf of our hard-working members, Colorado residents and all Americans who see a growing need for reliable energy, I urge you and your colleagues to issue necessary permits for the Critical Energy Reliability Link Project.

Sincerely,

Danny Hendrix
Business Manager
Pipeliners Local 798

RE: LETTER OF SUPPORT: Critical Energy Reliability Link Project, FERC Docket No. CP25-539-000

Dear Ms. Bose:

We are writing to express strong support for the Critical Energy Reliability Link Project ("Project") filed by Rockies Express Pipeline LLC ("REX") with the Federal Energy Regulatory Commission (FERC) under Docket No. CP25-539-000.

This project is expected to support more than 1,000 jobs, many going to members of Pipeliners Local 798, a trades union that represents thousands of America's most skilled and seasoned workers who live and work across the country. Our members in Colorado are proud to have an opportunity to work on this particular project because we recognize the critical role it will play for local, state and national economic and energy security, as well as its commitment to environmental sustainability.

Colorado ranks 8th nationally for energy insecurity, with nearly one-third of households struggling to pay their energy bills. Adding to those workforce struggles, in a time of rising costs, 20% of small businesses are closing within their first year of operation. To be clear, energy affordability and economic competitiveness are inextricably linked.

Colorado ranks as the 12th most expensive state in the nation, 32nd in energy competitiveness, and recently received a C-minus on the 2025 Infrastructure Report Card from the American Society of Civil Engineers – all of which underscore the urgent need for investments in critical infrastructure that can deliver affordable, reliable energy to our communities.

As a more than half-billion-dollar investment, Tallgrass plans to build this pipeline through labor union contracts. This will bring thousands of jobs and opportunities to the region – both directly, through our skilled construction workforce, and indirectly, through local entrepreneurs and businesses who will benefit from this investment – as well as millions of dollars each year in tax revenue to fund critical and essential services.

We urge FERC to approve this vital infrastructure project.

Signed,
