PA House Environmental and Natural Resource Protection Committee  
Main Capitol Building  
Harrisburg, PA 17120

RE: Pennsylvania House Bill 1946

Please accept the attached letter expressing concern over House Bill 1946, particularly its impact on Pennsylvania's oil and gas industry. I am submitting this on behalf of Pipeliners Local 798, a proud trades union representing the nation's most finely skilled and dedicated industry craftsmen.

The names you see on the following pages include 1,193 Local 798 members, Pennsylvania residents and other community members who recognize the tremendous need for investment in energy infrastructure in the region and the detrimental result of potential increased setbacks for natural gas wells.

A strong energy industry, especially in this shale-rich state, is central to supporting our economy and job opportunities for the local skilled workforce. I thank you for taking time to review the attached letter and the men and women standing up for a bright future for Pennsylvanians.

Sincerely,

A handwritten signature in black ink that reads "Justin Wallace". The signature is written in a cursive, flowing style.

Justin Wallace  
Business Manager  
Pipeliners Local 798

Harrisburg, PA 17120

RE: Pennsylvania House Bill 1946

Dear Chairman Vitali, Chairman Rader, and Members of the PA House Environmental and Natural Resource Protection Committee:

I stand with Pipeliners Local 798, other industry craftsmen and the growing number of Pennsylvania residents who are concerned about the implications of House Bill 1946 on the state's energy and economic future.

A key proposal in the bill is a required 2,500-foot setback from any water sources. This mandatory increased setback distance provides little to no environmental benefits given the current high safety standards that pipeline operators and contractors follow under both state and federal regulations. Act 13 of 2012 established proper setback distances in the state, and we see application to the natural gas industry in several other Pennsylvania state statutes, such as the Clean Streams Law, the Air Pollution Control Act and the Waste Management Act. The Department of Environmental Protection also currently carries strict requirements for both surface and subsurface activities.

A significant concern of mine is the bill's impact on energy access and affordability. By prohibiting production from an area 25 times larger than currently protected areas, this directly restricts access to Pennsylvania natural gas. Knowing that more than half of Pennsylvania's electric power flows from natural gas-fired power plants, this restriction would threaten energy reliability for families and small businesses across the region and add to the growing affordability crisis.

Any restriction on energy development in Pennsylvania would be detrimental to the state's economy. This industry supports 93,000 direct natural gas and oil jobs – many of these going to members of Pipeliners Local 798. This is in addition to more than 306,000 jobs in related industries, including truck driving, manufacturing, hospitality and contracting. All this activity injects billions of dollars in the state economy, helping to support critical public services and improve the quality of life for all who call Pennsylvania home.

The state's industry is producing natural gas safely – and arguably more efficiently – than ever before. We need to prioritize a robust energy network to further this success, not impose unnecessary setbacks that inhibit it. This is why I urge you and your colleagues to oppose HB 1946 in its current state.

Signed,
