Gaithersburg, MD 20898

RE: File. LRE-2010-00463-56-A19; Enbridge’s Line 5 Straits Tunnel Project Environmental Impact Statement

Dear District Engineer:

As Business Manager of Pipeliners Local 798, I am proud to submit the attached comment to support Enbridge’s Line 5 Straits Tunnel Project as you consider updates to its construction scope.

On the following pages you will find the names of 3,368 industry workers, business owners, community leaders and other residents across the region who recognize how Line 5 will responsibly address our growing energy needs. A number of these advocates also submitted verbal comments in recent weeks to support a swift approval.

Our members, who include the nation’s most highly trained and skilled pipeline industry workers, are well versed with Enbridge’s demonstrated diligence in maintaining and improving all of its energy delivery systems, particularly the Line 5 system in Michigan.

I thank you for your attention to the voices on the following pages and ask that you stand with our members in helping ensure residents in this region maintain access to reliable domestic energy through projects like Line 5.

Sincerely,

Danny Hendrix  
Business Manager

Pipeliners Local 798

District Engineer – Army Corps of Engineers  
16501 Shady Grove Road  
P.O. Box 10178  
Gaithersburg, MD 20898

RE: File. LRE-2010-00463-56-A19; Enbridge's Line 5 Straits Tunnel Project Environmental Impact Statement

Dear District Engineer:

I stand with Pipeliners Local 798 in support of Enbridge Energy's Line 5 Straits Tunnel Project, especially in light of the Army Corps' proposal to incorporate horizontal directional drilling on project construction.

Enbridge's acceptance of this drilling proposal – which was announced suddenly before permit review was scheduled to wrap up and alters plans that have been under review for years – is the latest example of its commitment to working with regulators to develop this infrastructure in the safest and most responsible manner. Construction looks to be delayed further now on the already long-delayed project, but our members respect the environmental reasons for the proposal, as it would eliminate the full-scale excavation needed for a tunnel.

The permitting process for Line 5 has allowed extensive opportunity for review and comment, through which Enbridge continues to seek the highest level of safety and environmental responsibility. This is one of several reasons why I believe the Line 5 Straits Tunnel Project deserves approval from the Army Corps and other decision makers, including:

- Enbridge continues to maintain a proactive inspection program to monitor the fitness of Line 5, including evaluating the pipe's interior inch by inch every five years using in-line inspection tools that provide detail on par with MRIs in the medical industry;
- All products that enter the pipeline are still to be inspected and treated to prevent corrosion, and the system is operated at a low pressure to minimize stress on the pipe – all in an effort to protect the pipeline and the Straits;
- Enbridge has paid tens of millions of dollars in property taxes across the state for its energy infrastructure projects. The state invests this revenue into schools, roads and bridges and other important public services;
- This project will create good jobs for the local workforce, many of whom include Local 798 members who depend on these jobs for their livelihood.

Prior to the Army Corps update in November, the permitting process for Line 5 already ensured more than adequate opportunity for review and comment, through which Enbridge has demonstrated a clear plan with the project to help ensure an uninterrupted supply of reliable, affordable energy to Michigan and the region. This is why I ask the Army Corps to efficiently

complete this review and approve necessary permits without any delay beyond what was already imposed by the horizontal drilling proposal.

Signed,
