About Us

The London Environmental Network (LEN) is an environmental charitable organization that helps to protect the environment and build a more sustainable city. The LEN works hard each year to offer environmental programs and climate action opportunities for all residents to build participation, collaboration, and capacity to co-create positive environmental change in London, Ontario.

The LEN is on a mission to reduce greenhouse gas emissions and create a cleaner and more prosperous future through the implementation of new and emerging green technologies.

Nonprofit Resiliency Project

This year, the LEN is celebrating the end of the year by launching our Retrofits for All donation campaign. Funds raised from this campaign will go towards one of the LENs programs: The Nonprofit Resiliency Project (NRP), a program that supports low-income nonprofit organizations in London and Middlesex that provide housing for vulnerable groups. Partnering with eight organizations, this program is taking steps towards big change by implementing sustainable retrofits across more than twenty multi-unit residential buildings, transforming them into more energy efficient, comfortable and resilient spaces. We have set a goal of \$10,000 raised by the end of the year to go towards retrofit support!

London
Environmental
Network

Help us reach our goal of \$10,000 raised this giving season so that we can propel the environmental, social and economic impacts of this program.

Here is how you can help:

- **Donate** your preferred amount to help us reach our goal
- Become a monthly donor to **Sustain** our work
- Show **Support** by sharing our page if you are not in the financial position to donate

This year, the LEN supported a clean energy transition by completing more than 300 EnerGuide Assessments, provided 10 rebates to support financing residential retrofits and reached more than 3,500 subscribers through our monthly newsletter! We are deeply grateful for your generosity and we thank you for being a pillar of support for the LEN.

Sincerely,

The London Environmental Team
