

PETITION to STOP the SLASH, TRASH and PRIVATISATION of our NHS!

We call on councillors to do everything in their power to stop the local Sustainability and Transformation Plans (STPs), and to actively campaign against them, since they abandon the NHS principle and practice of comprehensive, publicly-provided and publicly-funded healthcare for all, free at point of need; and to work with MPs, residents and campaigners to restore the NHS to these founding principles. We call on councillors to do the following:

- Call for the release of the STPs and all related documents, including the STPs' crucial financial and staffing appendices.
- Call in the STPs for scrutiny and oppose them on the grounds that they will damage the local population's healthcare and will not meet their healthcare needs, and refer the proposals to the Secretary of State.
