

**CORPORATE RIGHTS...
CORPORATE RULE...
CORPORATE DOMINATION...**

... will still be the reality after today and the November general election – regardless of who's elected President, U.S. Senator or Representative, or any state or local official

Insurance corporations shouldn't decide our access to healthcare.
TV, cable, radio and social media corporations shouldn't determine what information we receive.

Fossil fuel corporations shouldn't legally destroy the environment
Any corporation shouldn't influence who gets elected to public office.

Yet, corporations have been granted many constitutional "personhood" rights that have given them enormous power over the rights of human persons to protect our health, safety, welfare, and the natural world

We need to elect better representatives. But we also need to expand the growing peoples' movement to end corporate constitutional rights by enacting HJR54, the We the People Amendment
