In the Forest:

#StandUp4Forests

**Our native forests & endangered animals & plants
are being logged to extinction**

You can help protect them

Find out more details via this QR code

Welcome to #Fridays4Forests

A movement of people committed to gathering at 10am every Friday to StandUp4Forests and protect them from logging.

We engage in citizen science and media to let the world know what is happening in our forests and we invite our friends and community to join us and we call upon decision makers and opinion leaders to act urgently to protect our public native forests from logging

How to Join In

1. Join the Fridays4Forests Facebook Group
2. Invite your friends to do the same
3. Come along to Fridays4Forests gatherings in towns &/or forests near you (organise events for your local area if there isn't already an existing group)
4. Take photos and videos of yourself and your crew and share them on social media (follow the How To #StandUp4Forests instruction sheet)
5. Explore your forest and document its ecological values
6. Share knowledge on effective citizen science and citizen media techniques
7. Write media releases, letters etc to the media and decision makers about your activities, what you have found and demand that our public native forests be protected permanently.
8. Invite everyone you know to join you.

Forests Survey Kit

In the forest - water, hat, phone, notebook or clipboard, hand lens (to look closely at the underside of leaves to help with ID) binoculars and diameter measuring tape optional.

Start at home by signing up to the Forestry Corporation portal;

<https://planportal.fcns.wa.gov.au/>

Harvesting plans only go live 48 hours before logging or roading is due to commence.

5 Key documents, download as PDF as soon as you see them;

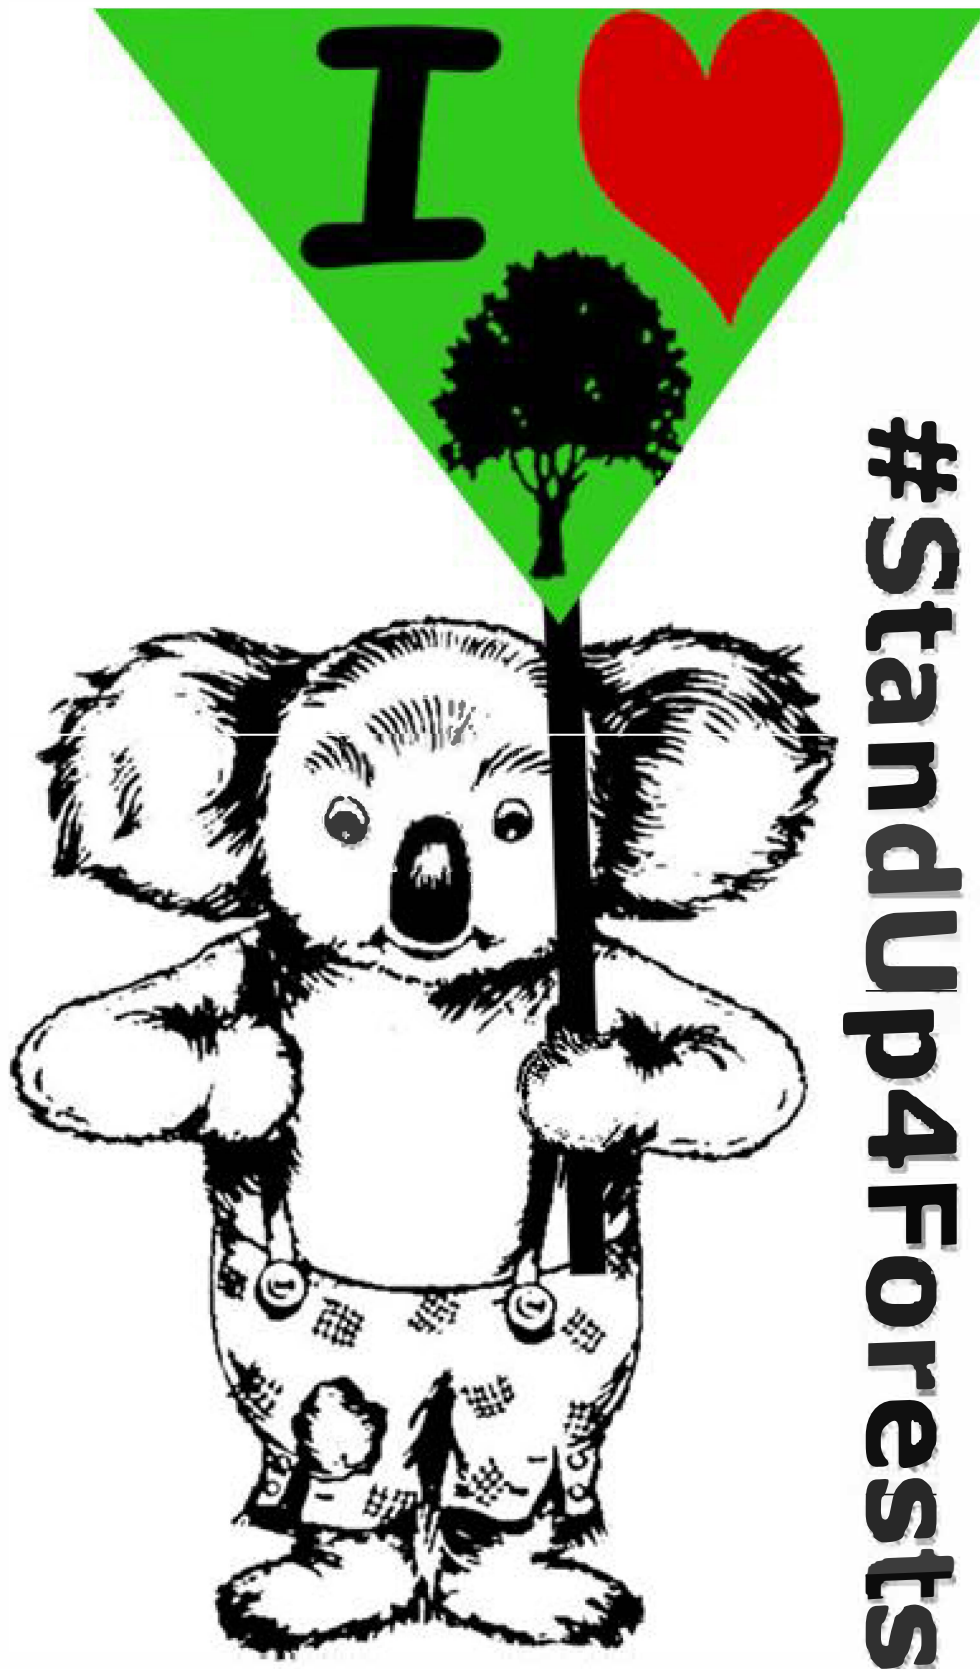

- Flora profile
- Roading map
- Locality map
- Harvest plan & map

We have been using EpiCollect5 app to collect and store data

<https://five.epicollect.net/>

Other Useful Resources

- Plant identification books or apps;
- Book <https://www.mangrovestomountains.com/>
- The Red Book
- Website <https://plantnet.rbgsyd.nsw.gov.au/search/simple.htm>
