

**£BILLIONS FOR  
UKRAINE**

**WHILST BRITS  
FREEZE**

Energy prices are soaring and many British families face the frightening choice between 'eating and heating'. But one group of Britons who won't have to make that terrible choice are Liz Truss and her fellow politicians. They will all be warm and well fed this Christmas - their lavish lifestyles all paid for by the people who are struggling to make ends meet.

The truth is, it is Liz Truss and her fellow politicians who are the root cause of the suffering that British people will endure this winter. Truss and her friends have needlessly involved Britain in the conflict in the Ukraine - pumping billions of pounds of taxpayers money into military and economic aid as well as imposing sanctions on cheap Russian gas.

But the cost of Truss involving Britain in this foreign conflict is that energy prices have soared and normal Britons are feeling the pain. And the REAL cost of these soaring energy costs will, if it is a cold winter, be a massive surge in excess winter deaths - something that will no doubt disproportionately affect both pensioners and those on the poverty line.

Isn't it ironic, just two years ago the Conservative government told us to stay at home and 'observe social distancing' in order to 'keep Granny safe'. At the same time they were partying at Downing Street. Now they are happy for Granny to freeze to death so they can involve Britain in yet another foreign conflict that has nothing to do with the British people! But you can be guaranteed of one thing - the politicians will still be partying in Downing Street and the heating will be on full!

The Conservatives have betrayed the British people again and again and it's time to say 'ENOUGH IS ENOUGH'. We should be putting British people first in this time of need, those billions being sent to the Ukraine should be spent helping British pensioners survive this winter. Britain should stay out of foreign conflicts and do what's best for people here at home.
