

The Good

Rules of origin: Strengthened for the automotive, chemical and other sectors

Labor content rules: 40-45% of the value of automobiles must be made by workers making at least \$16/hr

Investor-State Dispute Settlement (ISDS): Terminated as to Canada and severely curtailed as to Mexico

Currency manipulation: Though the prohibition text is not as strong as it could be, this issue makes its debut in this agreement

Cross-border trucking: The US can adopt new restrictions on unsafe Mexican domiciled carriers

Labor standards: Improved rules relating to violence, migrant workers, the right to strike, forced labor and child labor

NEEDS IMPROVEMENT

- Country of origin labeling for beef and pork
- Enforceability of labor standards
- Prohibit the relabeling of imported meat packages as “Product of the USA” which is currently, but wrongly, allowed by USDA regulations

CPA appreciates the improvements negotiated by the USTR. We await the implementing bill to decide whether we support or oppose.
