

DRUG ALERT

FRI. DECEMBER 19, 2025

WINNIPEG

On November 28, a sample of a **burgundy/brown pebble** believed to be sold as **DOWN** was found to contain a mix of **fentanyl** analogues, **medetomidine** (an animal tranquilizer) and **benzodiazepines**.

Combining these substances is more likely to cause complex overdose. **Naloxone does not work on tranquilizers or benzos.**

The sample was **associated with a severe drug poisoning** where 2 hours and 10 doses of naloxone were required to revive a person.
