

Two Urgent Matters: Syria and East Palestine, Ohio

(March 2, 2023)--On February 21, the Schiller Institute hosted a panel discussion about the horrific situation in Syria, where thousands have died and millions have been made homeless because of the recent earthquakes (see QR code below). This would be bad enough, but thanks to the US sanctions and occupation of the country, over 90% of the people were below the poverty line even before the quake struck. Congressman Matt Gaetz (R-FL) has introduced H Con Res 20 to get the U.S. troops out of Syria, effective within 15 days of the bill's passage. We need a *huge* national mobilization to get this done, both for the good of the Syrian people, and the American soldiers who are in harm's way for no reason. Democrats who opposed the Syria war in the past must be pressed to add their names as co-sponsors. Please call your Congressperson *today* to sign on. We have only until March 15th. You can find your Representative and their contact information via the QR code below.

America off the Rails: What Happened in Ohio?

This Friday (March 3, 2023) I have invited two guests, both of whom are writers and researchers for LaRouche's EIR News Service to discuss what actually happened with the train derailment in E. Palestine, OH, and what needs to be done to ensure that such things stop happening. Once again, we see Wall Street sucking the blood out of the shrinking physical productive part of the U.S. economy, cutting corners in order to bring in more loot for the shareholders. To solve this, we need to return to American System methods, and master the principles of physical economy developed by American statesman Lyndon LaRouche, who never made an incorrect economic forecast.
