86141700-Educational technology

Opportunity Details

Detailed Description
Support is needed to create an integrated 10-year Strategic Plan (the "Plan") for the Ontario Science Centre that positions it for future sustainability and success. This Plan will consider the role of the Science Centre within the province as a leader in informal learning; an unforgettable destination for Ontarians and tourists; a valuable member of the community; an integral part of the innovation & education ecosystems; a partner of choice; a trusted voice of science; and a proponent of STEM equity

Scope of Work
The Plan will be the foundation upon which key activities will sit including: the Science Engagement Model; and strategies associated with partnerships, fundraising, digital, and community engagement. Integration of these under a comprehensive vision for the Ontario Science Centre is essential, as success in any one individual area will otherwise be limited. The Plan should contemplate the opportunity for the Science Centre's flagship location at the waterfront as well as how it will fulfill its provincial mandate. This may include broad approaches to outreach as well as the use of the flagship location to advance the newly identified vision and mission.

Title (French)	* Title (French)	Planification stratégique	Buyer
Detailed Description (French)	* Detailed Description (French)	Un soutien s'avère nécessaire pour créer un plan stratégique intégré de 10 ans (le « Plan ») qui positionne le Centre des sciences de l'Ontario dans une perspective de durabilité et de succès. Le Plan considèrera le Centre des sciences dans son rôle de chef de file de la province en matière d'apprentissage informel; de destination inoubliable pour les touristes, les Ontariennes et les Ontariens; de	Buyer

		<p>un membre précieux de la communauté; de partie intégrante des écosystèmes de l'innovation et de l'éducation; de partenaire de choix; de voix fiable pour les sciences; de promoteur de l'équité dans les STIM (sciences, technologies, ingénierie et mathématiques).</p>	
Scope of Work (French)	Scope of Work (French)	<p>Des activités importantes se baseront sur ce Plan fondamental, notamment : le modèle de la participation aux sciences; les stratégies associées aux partenariats, aux collectes de fonds et à la participation communautaire et numérique. L'intégration de ces éléments dans une optique exhaustive du Centre des sciences de l'Ontario est cruciale, sans quoi la réussite individuelle de chacun de ces secteurs sera restreinte. Le Plan doit considérer l'édification d'un bâtiment vedette du Centre des sciences au bord de l'eau ainsi que les façons dont il s'acquittera de son mandat provincial. Ces considérations combineront les stratégies de dissémination et l'exploitation du bâtiment vedette pour promouvoir une vision et une mission récemment développées.</p>	Buyer
