## No. 1 for SLF Council

### Committed-Effective-Caring

Dear friend

Recent by-election victories are giving our Party renewed momentum, the question is in which direction that will take us. SLF must have a clear and important role in defining that.

I want to use my experience as a successful campaigner to help SLF build on its work to create a Social Liberal philosophy and campaigning party for the 21<sup>st</sup> century. Policies that will motivate people and actions that change society.

Our Community Politics must aim to empower people rather than just win their votes. Our Climate Change agenda must reduce emissions but not leave the poor worse off. Our Health Care commitments must profit patients first and not business.

We need the big ideas and the vocabulary to inspire people and create the momentum needed for social change and a fair and just society.

Please vote for me for the SLF Council. Let us build success together.

*Richard*
